TRIAL COURT OF THE COMMONWEALTH
BOSTON, MASSACHUSETTS 02108

ARTHUR M. MASON
CHIEF ADMINISTRATIVE JUSTICE

June 1, 1982

Honorable Edward F. Hennessey
Chief Justice
Supreme Judicial Court
13th Floor
New Courthouse
Boston, Massachusetts 02108

Dear Chief Justice Hennessey:

This report covers the third full year of operation of the Trial Court of the Commonwealth established under the provisions of the Court Reorganization Act of 1978 and is submitted in compliance with the provisions of G.L. c. 211B, §9 summarizing the activities of the Trial Court for Calendar Year 1981.

Included in the report once again are reports of the Office of the Commissioner of Probation and Jury Commissioner for Middlesex County.

Your continuing support, and that of the Justices of the Supreme Judicial Court, of our efforts to promote the orderly and efficient administration of justice within the Trial Court is most appreciated.

Sincerely,

A handwritten signature in blue ink that reads "Arthur M. Mason". The signature is fluid and cursive, with the first name "Arthur" and last name "Mason" clearly legible.

Arthur M. Mason
Chief Administrative Justice

AMM:SEH
Enclosure

OFFICE OF THE CHIEF ADMINISTRATIVE JUSTICE

The Office of the Chief Administrative Justice continued in its responsibility to oversee and implement programs designed to assist the various courts in becoming more efficient and effective in carrying out the Court Reorganization Legislation of 1978.

The following report is a summary of these programs and the steps taken by the Office of the Chief Administrative Justice to implement them.

PERSONNEL/EMPLOYEE RELATIONS

The personnel related functions of the Office of the Chief Administrative Justice include personnel, affirmative action and employee relations. Each of these units is responsible for the implementation of specific mandates determined by the Chief Administrative Justice.

In the area of personnel administration, the Trial Court Personnel Policies and Procedures Manual was distributed during 1981 to all Trial Court appointing authorities, i.e., judges, clerk-magistrates, registers and chief probation officers. The Manual consolidated into one document both general policy

statements and guidelines to follow in hiring, affirmative action, changes in employee status, travel, benefits standards of conduct, disciplinary procedures, and required personnel records.

This unit also reviews hiring practices in the various courts, reviews and approves these practices and processes worker's compensation claims.

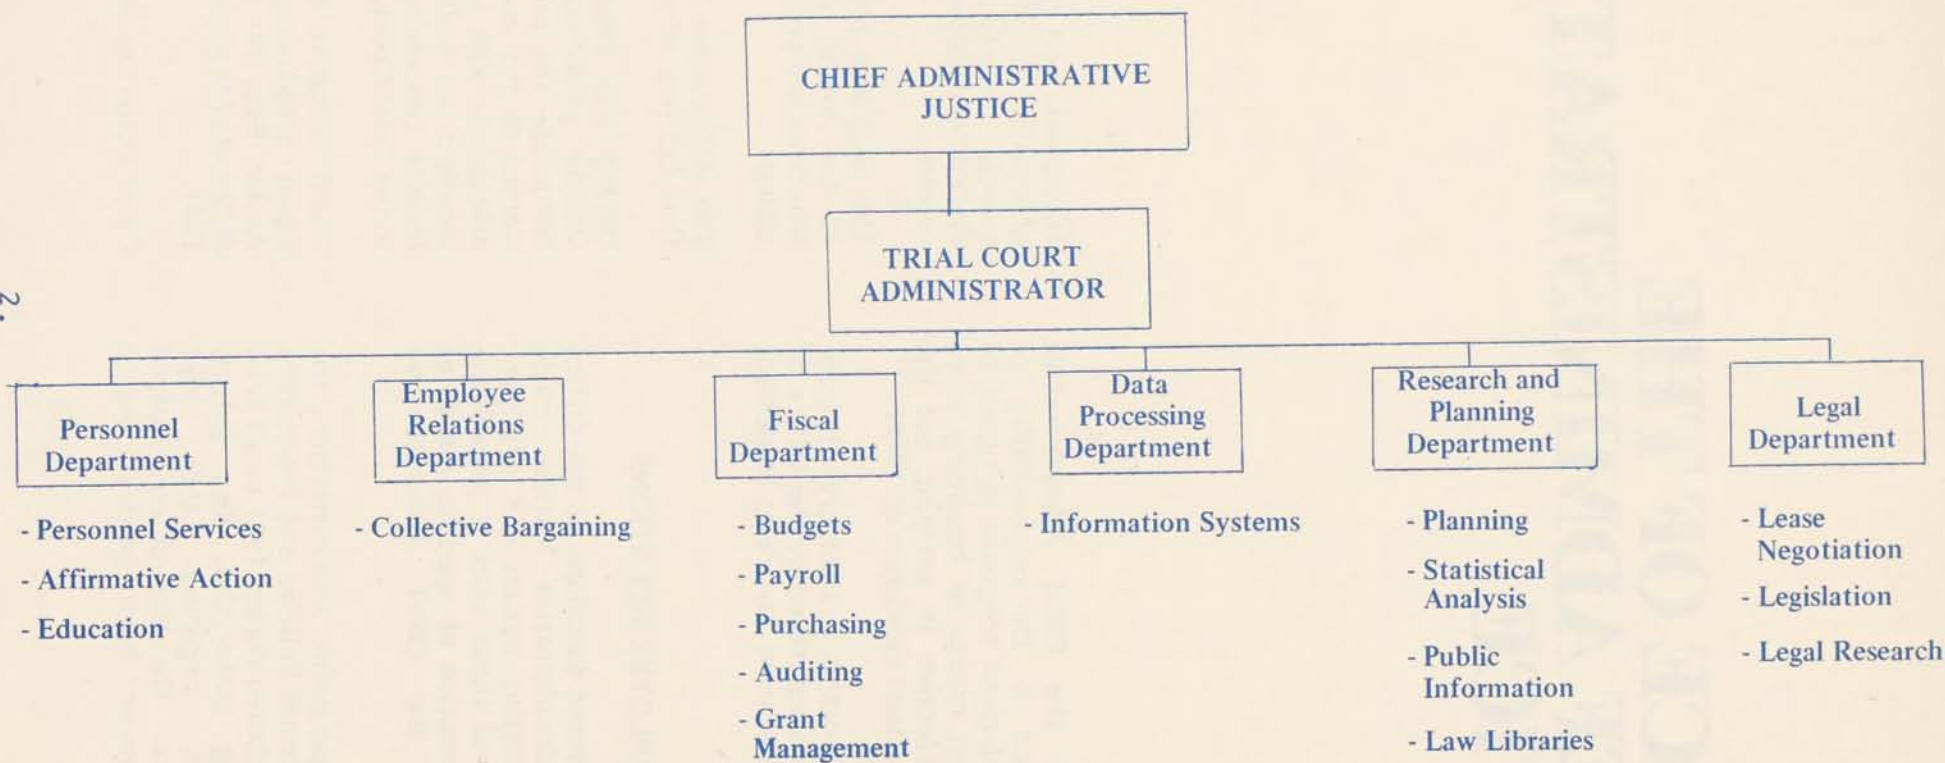

The Affirmative Action office completed its first full year of operation in 1981.

During the year, the Affirmative Action Officer participated in many programs to encourage the recruitment of minorities and women in the courts through site visits and discussions with hiring authorities in 70 court locations as well as with school and civic leaders concerning employment opportunities in the Trial Court.

The Affirmative Action office has produced an Equal Employment Opportunity/Affirmative Action Plan for the Trial Court which was distributed to appointing authorities on July 17, 1981.

Other activities of the office of the past year

OFFICE OF THE CHIEF ADMINISTRATIVE JUSTICE
OF THE TRIAL COURT

include the establishment of a resume bank currently consisting of over 300 resumes; the establishment of goals and timetables for the hiring of minorities and women in the Trial Court; the establishment of a system, with the assistance of the Data Processing Department, to generate periodic profiles of the Trial Court workforce according to race, sex, job classification and salary structure; the production of an EEO/AA policy statement for posting in public places; and the initial draft of a brochure containing questions and answers to EEO/AA.

EMPLOYEE RELATIONS DEPARTMENT

The Employee Relations Department of the Office of the Chief Administrative Justice represents the Chief Administrative Justice in Collective Bargaining matters concerning employees of the judiciary. All employees of the Judicial Branch (approximately 3,882) who have a right to organize for collective bargaining purposes under M.G.L. c. 150E have been organized by Unions into five separate units as follows:

Local 254, S.E.I.U. represents approximately 1,400 Probation Officers and Court Officers, except Court Officers in the Superior Court, Middlesex and Suffolk Counties.

The Middlesex County Superior Court Officers' Association represents approximately 57 Court Officers in the Superior Court (Middlesex County).

The Suffolk County Superior Court Officers' Association represents approximately 75 Court Officers in the Superior Court (Suffolk County).

Local 6, O.P.E.I.U. represents approximately 2,300 non-professional staff and clerical employees.

Local 6, O.P.E.I.U. represents approximately 50 professional staff employees.

During the calendar year 1981, the three year labor Agreement with Local 254, S.E.I.U.

expired (on June 30, 1981). The parties commenced bargaining during March and executed a new three year Agreement (July 1, 1981 to June 30, 1984) on June 3, 1981. On approximately December 2, 1981, the appropriation necessary to fund the incremental cost items contained within the Agreement were finalized by the Governor and the General Court.

It is significant to note that the renegotiated Agreement with Local 254 has resulted in a more substantive and meaningful salary program for covered employees as summarized in the following matrix.

	Agreement 7/1/78 to 6/30/81	Agreement 7/1/81 to 6/30/84
No. of Salary Schedules	3	2
No. of Salary Levels	27	10
No. of Salary Steps	9	7*

*Effective 7/1/83

The three-year Agreements with (1) the Middlesex County Superior Court Officers' Association, and (2) the Suffolk County Superior Court Officers' Association expired on June 30, 1981. The Office of Employees Relations continues contract renegotiations with each Union.

On April 6, 1981, a "first" contract was executed with Local 6, O.P.E.I.U. representing the non-professional staff and clerical employees. This Agreement covers the three year period from July 1, 1980 through June 30, 1983. On approximately November 9, 1981, the appropriation necessary to fund the incremental cost items contained within the Agreement were finalized by the Governor and the General Court.

The Office of Employee Relations is presently in contract negotiations (a "first" contract) with Local 6, O.P.E.I.U. in an effort to reach an Agreement covering the professional staff employees.

The Agreement with Local 6, O.P.E.I.U.

covering non-professional staff and clerical employees' includes the Trial Court's Personnel Classification and Compensation Plan. This Plan provides Management and employees with a professional position evaluation and classification system, which applies equitably and consistently in salary administration.

During May, June and July, the Chief Administrative Justice sponsored a management training seminar in "Positive Contract Administration." The program was attended by presiding justices, clerk-magistrates, registers of probate and administrative staff members. The content of the program included segments on the history of public sector collective bargaining in Massachusetts; managing under a labor contract; union rights and responsibilities under the contract; grievance handling; conflict resolution and problem-solving; effective communication; and progressive/effective discipline.

Instructors for the training program were drawn from the University of Massachusetts Labor Relations and Research Center and the Institute for Governmental Services.

The following chart provides a statistical summary by each Union of the number of grievances filed, the number of grievances submitted to arbitration and the number of prohibitive practice charges filed with the Massachusetts Labor Relations Commission.

Statistics

Grievances and Arbitrations Filed by Union:

Union: Local 254
Job Group: Court officers
Grievances Filed: 11
Submitted for Arbitration: 2
Pending Arbitration: 1
Withdrawn by Union: 2
Declined Arbitration: 1

Union: Local 254
Job Group: Probation Officers
Grievances Filed: 28
Submitted for Arbitration: 3
Pending Arbitration: 6

Withdrawn by Union: 2

No. of Charges Filed: 2
Disposition Pending: 1
Disposition Withdrawn: 0
Disposition Decided: 1*
*Dismissed by Labor Relations Commission

The preceding figures are recorded based on date action is taken within time period being reported. Therefore, figures will not "balance out" since they are not cumulative.

FISCAL DEPARTMENT

Responsibility for fiscal oversight of the Trial Court, as well as the preparation of a unified budget, its presentation and defense rests with the Chief Administrative Justice. The Fiscal Department of the Office of the Chief Administrative Justice carries out these responsibilities.

Fiscal Systems Manual

During 1980, a Fiscal Systems Manual, containing step by step instructions for the completion of every fiscal transaction each court division performs, was distributed. In 1981, the Manual was updated to include both new procedures, and the clarification of previously described procedures. Procedures in the areas of purchasing were added, as well as the procedures to be followed in using the special checking accounts with the Arlington Trust Bank for payments for juries, witnesses, or transportation of prisoners.

Electronic Cash Register System

The millions of dollars from fees, fines and forfeitures which are received by the courts present several problems. The main issues are control of the funds received to the appropriate receipt category and final recipient. It was determined that an Electronic Cash Register (ECR) system would best assist in meeting the above needs.

When a check or cash payment is received, the ECR generates a receipt for the customer which includes: date, docket number, category (fine, court costs, civil fee, etc.), amount paid, cash or check, change returned, cashier identification, transaction number. The ECR journal tape which is locked within the unit also contains identical information.

All primary cashiers have their own keys and

cash drawers, therefore, no one need ever handle or have access to another cashier's change or receipts.

Part of the day's reports taken by the bookkeeper include a print-out of every detail of all business done by each cashier.

As part of its mandatory routine, the ECR requires that each document processed (citation, parking ticket, complaint, civil entry form, etc.) be passed through the ECR slip-printer for validation line imprinting. The validation line includes: transaction number, amount paid, date, cashier, receipt category charged.

This same information plus the docket number is printed on the customer receipt tape and the internal journal tape. Therefore, an auditor by referencing the docket number of the journal tape or customer receipt can go to the appropriate file, pull out the citation in question and by checking the validation line confirm identical transaction number, date, receipt category (fine, costs, divorce, probate), and amount paid.

The Trial Court receives cash and checks daily which have to be charged to a great variety of categories (e.g., state fines, court costs, non-criminal chapter 89/90, civil entry fees, bails, probate, divorce, etc.) and which are ultimately disbursed to many different recipients (e.g., Fish and Game Commission, various cities/towns, private individuals, state colleges, other courts, State Treasurer, Feeral Government and others). Some courts with complicated jurisdictions need to account for as many and one hundred (100) categories and recipients. The ECR programs have enormously simplified the receipt accounting bookkeeping functions by simply striking the designated keys and storing all the accumulated data for later reports. All categories are reported in total amount of money received per category and number of entries per category. As these amounts need only be entered in summary (the journal tape has all the detail needed for audit, etc.) the accounting and disbursing is much easier. Previously, it was necessary for all receipts to

be handwritten, each entry had to be individually hand entered twice, and all totals manually calculated.

The ECR's selected were the result of an extensive pilot program and three rigorous competitions amongst all major and several minor vendors.

The One-Write System

A great number of court locations and probation offices for which Electronic Cash Registers (ECR's) were not available receive numerous payments. In the case of Clerk-Magistrates offices and in-courtroom collections, there are many different receipt categories (fines, costs, bail, divorce, probate, etc.) and a variety of final recipients (towns, state colleges, State Treasurer, private individuals) which must be handled by all the courts.

Previously, receipts were not always given to payers, numerous people handled the cash daily (whoever was at the counter), often each department kept separate handwritten cash sheets, the detail of which was later recopied by the bookkeeper into the cash receipt journal, and, if a receipt were given, it was written separately from the entries into the cash sheets.

The basis of the One-Write System is the use of multiple part forms which are either pressure sensitive or which have carbonized strips that causes whatever is written on the top form to also appear on those forms underneath.

The receipt system uses "shingled" pre-numbered receipts that are positioned in serial order on top of an extended cash journal sheet or "register". This extended sheet allows the immediate allocation of the payment to the appropriate receipt category and the carbonized strip backing the receipt causes the writing of the receipt to make the amount received, payer, date, docket number, etc. appear on the underlying register and a duplicate receipt is put into the specified case file as validation of payment. At the day's

end, the receipt category columns of the register sheet need only be totaled and entered in summary in the bound cash book. The individual sheets are retained for later reference or audit.

The One-Write Disbursement System operates in a similar way. In this case, duplicate checks are shingled in serial order over an extended disbursement register. The writing of the check itself results in the same data being imprinted on the duplicate check and the disbursement register, underneath.

There are two One-Write systems. One for Special Payments for witness costs, jury costs and for transportation of prisoners. By having separate "amount to be paid" boxes for each of these categories, the monthly accounting is greatly simplified.

The second system is a Central Banking system for general disbursements. The mechanics of check entry are somewhat similar for both systems. Each system also utilizes the duplicate checks mentioned earlier. Each Friday and at month's end, all duplicate checks on hand are mailed to Arlington Trust which then does a computer assisted reconciliation and mails back to each court a list of all checks paid, voided, and outstanding with respective dollar totals for each.

The Probation One-Write System, which is operational in some probation offices, performs in much the same way except that the probationer's ledger card is also used. The cashier writes the receipt and thereby makes an entry into the probation receipt register sheet. The bookkeeper later enters the receipt into the ledger card, writes the outgoing check for a non-support payment (for example) over the ledger card, making a simultaneous entry on the disbursement register sheet. Only daily summary entry is made to the receipt journal by the bookkeeper. In accordance with sound accounting principles and as required by the auditors, these procedures segregate cash receipting functions from bookkeeping and check writing.

During 1981, the Office of the Chief

Administrative Justice also implemented a central banking system. Until this system was implemented, each local court and probation office deposited funds in a local bank and then wrote checks against that account as needed. Although much of the money was disbursed each month to the State and towns, new funds were also always being deposited and some monies (bail for instance) remained on deposit for months and even years. The maximum being paid on most of these funds (between \$21,000,000 and \$31,000,000) by local banks was 5.5%. These same funds were being lent out at up to 21%. Clearly, the citizens of the Commonwealth were thereby losing millions of dollars in lost interest. , Therefore, in cooperation with the State Treasurer, the Trial Court has implemented a Central Banking

System. Each court continues to make daily deposits to their local bank. However, now at 5:00 p.m. each day, each bank wires all court funds to a central account credited to that court. The State Treasurer then invests the funds at the highest available current rates in the money market. These funds have been earning interest at the rate of 14-16% at great obvious benefit to the Commonwealth's taxpayers.

Fiscal Year 1982 Operating Budget

The Fiscal 1982 appropriation for the operating budget of the Trial Court, \$123,430,922 represents 2% of the total \$6,369,459,122 operating budget of the state.

The FY '82 operating budget breakdown, by Trial Court Department, is as follows:

Office of the Chief Administrative Justice	1,464,580	01.7%
Trial Court Central Accounts	31,171,816	25.3%
Superior Court Department	18,704,500	15.2%
District Court Department	48,576,150	39.4%
Probate and Family Court Department	11,254,076	09.2%
Land Court Department	1,289,800	01.4%
Boston Municipal Court Department	3,630,00	02.9%
Housing Court Department	838,700	02.9%
Juvenile Court Department	4,524,100	00.7%
Commissioner of Probation	1,633,100	03.7%
Middlesex Jury Commissioner	<u>344,100</u>	<u>00.3%</u>
	\$123,430.922	100%

(11)

It should be noted that the FY 82 appropriation is 2% less than the actual Trial Court expenditures for FY 81; this reduction in funds comes in a year of 19% inflation directly affecting the fixed costs of maintaining the system.

During 1981, budget planning and preparation began for the Trial Court's FY '83 budget request. New forms were devised this year to calculate figures to enhance both revenue and workload information. Planning for FY '83 has been extremely difficult, deficiency requests for FY '81 in the amount of \$6,000,000 were necessary for several courts, many of which had payroll deficiencies for the month of May of FY '81. Subsequent to the submission of the FY '83 budget requests, it was necessary to revise the requests to reflect changes dictated by the ratification of collective bargaining agreements with Local 6, O.P.E.I.U. (clerical employees) and Local 254, S.E.I.U. (probation officers and certain court officers) as well as salary adjustments for other Trial Court employees.

As in previous years, hearings were held with each court division in June and July, on their request, and budgets were submitted to the Office of the Chief Administrative Justice on August 1.

During 1981, the courts lost access to most federal funds. The most significant loss to the Judiciary is defunding of the CETA program, and the abolition of the Law Enforcement Assistance Administration. The CETA program provided the courts, at no cost, with employees who served as junior clerks, senior clerks, assistant probation officers, probation aides and case workers. The estimated value of these positions for one fiscal year (FY '81) was \$2,685,369; statewide, the courts had approximately 280 CETA positions. (Source: Trial Court Survey of Funding Sources)

The loss of these positions has adversely affected the courts, particularly in the loss of clerical assistance to deal with the volume of paperwork. In the District Court Department, the largest user of CETA workers, for example, civil business case entries have been

increasing each year, with a 17% increase since court reorganization in 1978. Yet, the clerical workforce to process the papers associated with these cases (CETA workers in many courts) has been reduced.

The other significant loss to the courts is the elimination of the discretionary and block grant programs of the Law Enforcement Assistance Administration. These funds provided the Trial Court divisions with in excess of \$1.75 million over the last three years; the OCAJ received \$2.75 million in the same period. These funds were used primarily for administrative purposes and to fund innovative programming approaches. They funded four mediation programs in the District Court Department; these programs diverted some cases from the judicial caseload, thus freeing up judge time to attend to other cases. Pre-trial diversion programs, restitution programs, victim/witness programs all provided additional staff to the courts to supplement existing programs. These no longer exist, thus shifting caseloads handled by these programs back to the regular court staffs.

Regional administrative staffs have been disbanded in the District Court Department, specialized training programs in contract administration, or other areas of ongoing management training will no longer be funded; consultants to develop new systems, or major equipment purchases such as the Burroughs 6800 computer and related software, and tape recorders for the courtrooms of the Trial Court, will no longer be possible. These LEAA funds made it possible for the courts to utilize new program ideas, modern management techniques and technology to bring them into the 20th century. A sizable federal investment was made; this type of assistance is no longer available.

EDUCATION AND TRAINING

During 1981, the Office of the Chief Administrative Justice continued to support the development of education and training programs for Trial Court personnel.

Unfortunately, the Legislature did not fund the centralized education account for Fiscal Year 1982 which began on July 1, 1981. However, during the first six months of 1981, this office was able to fund educational program efforts of the various Trial Court Departments. Despite the loss of funds, the Office of the Chief Administrative Justice made significant progress in the development of the following programs and projects.

The management and professional staff of the OCAJ participated in a series of management training seminars and workshops. The seminars covered such topics as the evolution of management, performance audits, motivation, perceptions and attitudes, working with groups, styles of management, participative management, managing change and setting goals and objectives. Some twenty-five staff members attended the seminars. In addition, smaller half day workshops were held in July covering such topics as performance, review and appraisal, interpersonal communications, time management, conducting meetings and project management.

The design of a management training program for presiding justices, clerk-magistrates and registers was begun in 1981. This office, the Kennedy School of Government of Harvard University, the Flaschner Judicial Institute collaborated in the design of the program, which, due to the loss of funds, will not be presented until the spring of 1982. Data was collected from site visits to nine courts by students and professors from the Kennedy School of Government. An Advisory Committee of judges, clerk-magistrates and registers was established to assist the Kennedy School of Government in identifying management issues and in reviewing program materials. The program will employ the case study methodology pioneered by the Harvard Business School. Six cases will be presented, three of which are based upon the data collected during the site visits. The three cases based upon the Trial Court will focus on issues on the management of personnel, the operational costs of the courts and the management of cases. It is anticipated that thirty presiding justices, clerk-magistrates and

registers will participate in the two-day session.

A collective bargaining agreement between the Trial Court and the Office and Professional Employees International Union (OPEIU, Local 6, AFL-CIO) was signed on April 6, 1981. This Agreement represents the unionization of some 2,400 clerical and non-professional employees in the Trial Court. The ability of the Trial Court to uniformly and equitably administer the contract required a comprehensive understanding of the terms of the contract. Recognizing the complexities of the collective bargaining process and the impact on the relationship between first-line management and staff, the Office of the Chief Administrative Justice contracted with the Labor Relations and Research Center and the Institute for Governmental Services of the University of Massachusetts to provide a two-day program in Positive Contract Administration. The program was first presented in Springfield in May and was repeated (6 programs in all) in various locations across the state during May, June and July. The program concentrated on management responsibilities under a contract, contract interpretation, grievance handling and the documentation requirements in disciplinary matters. One hundred and seventy (170) Trial Court managers were able to participate in these sessions.

The loss of funds for program development in the second half of 1981 prompted the education unit to commence work on the development of a comprehensive analysis of the education and training needs of the Trial Court. A written survey instrument, and a follow-up interview instrument were designed. The survey will not be administered until 1982. The results of the survey will be used to develop a long-range and comprehensive plan for the development of education programs for all Trial Court employees.

Programs funded and/or sponsored by the Office of the Chief Administrative Justice are as follows:

EDUCATION CALENDAR 1981

Probate and Family Court Department Guardian Ad Litem Roundtable	January, 1981
Office of the Chief Administrative Justice Court Officer Training (2 programs)	February, 1981
District Court Department Clerk's Conference (2 programs)	May, 1981
Superior Court Department Clerk's Conference	May, 1981
District Court Department Judges Seminar with Brandeis University	May, 1981
Probate and Family Court Department Judges' Conference	May, 1981
Office of the Chief Administrative Justice Management Training for Staff	May, June, July, 1981
Office of the Chief Administrative Justice Trial Court Managers, Labor Agreement Management (6 programs)	May, June, July, 1981
District Court Department Judges' Conference (2 programs)	June, 1981
District Court Department Clerk's Conference (2 programs)	November, 1981

LEGAL DEPARTMENT

The Legal Department of the Office of the Chief Administrative Justice serves as liaison between the judicial and the executive and legislative branches of the state government.

Duties of this Department include the preparation, review and filing of legislation on behalf of the judiciary as well as the day-to-day monitoring of the legislative process. Supportive and research material is also provided to the Judicial Conference at its regularly scheduled meetings.

The Legal Department, in its principal

function to provide research assistance to the Chief Administrative Justice and the Trial Court Administrator, prepares memoranda in response to inquiries from the Legislative Committees as well as to the Governor's Legislative Office and responds to questions of a legal nature from within the judicial system and to the general public on a variety of subjects.

The Department is responsible for the review and approval of all contracts entered into by the Trial Court including contracts for the rental of court space and the purchase and leasing of personal property. The Legal Department drafts and submits to the Chief

Administrative Justice, proposed Administrative Directives, Orders, correspondence and information bulletins. The Department also assists the Chief Administrative Justice with his responsibility to review all proposed rules and amendments of the various Departments of the Trial Court and provides support to Trial Court Committees working in these areas.

The Legal Department provides assistance in personnel matters and in the development of standard personnel policies and procedures.

The Department also has participated and provided assistance in the ongoing efforts to develop and standardize forms and procedures throughout the Departments of the Trial Court.

In Fiscal Year 1982, the Legislature funded the cost for indigent representation, with the exception of the Massachusetts Defenders Committee, in a centralized account under the Office of the Chief Administrative Justice. County Bar Associations established non-profit corporations in a cooperative effort with the Trial Court to involve members of the private bar in indigent representation. The Office of the Chief Administrative Justice negotiated contracts with these County Bar Advocate Groups to provide indigent representation in eleven (11) counties. The only counties without Bar Advocate programs are Berkshire, Nantucket and Suffolk.

It is anticipated that the Bar Advocate programs will insure the continued involvement of many members of the private bar in the representation of indigents and reduce indigent costs to the Commonwealth through the efficient and effective administration of the programs. Each program will be responsible for compiling statistics on the type and number of cases and actions where representation has been provided and submitting that information to the Office of the Chief Administrative Justice on a monthly basis. A contract has also been negotiated with the Roxbury Defenders Committee, Inc. to provide criminal defense services for indigents in the Roxbury Division of the District Court Department.

PLANNING AND OPERATIONS

In past years, planning has focused on expanding the management capability of the courts through the management of available federal funds. However, with the potential for any future funds available to the courts in jeopardy, particularly from the Department of Justice, this planning activity has changed to one of resource management.

Efforts have been concentrated in the area of managing equipment resources and available space. An automated equipment inventory system tracks, for each piece of equipment, its purchase, its identification tag number, serial number, cost, purchase date, and, for equipment no longer in place in the court, disposition information. This system provides a valuable tool for budgetary analysis of new equipment requests, as well as for the transfer of usable equipment between court divisions.

A records' management project has resulted in the development of a record retention/destruction schedule for court administrative and non-case related papers. This document, to be used in conjunction with the retention provisions of Supreme Judicial Court Rule 1:11, allows the courts to selectively destroy certain papers, thus freeing up valuable and scarce filing space.

Available federal funds were used for a variety of court projects designed to enhance the court's ability to better manage its resources. An audit manual for the use of the internal auditors was written, Standard Operating Procedures Manual for the Probate and Family Court registries was developed, and a needs assessment for determination of training needs was developed. The needs assessment will be conducted in early 1982. Training for court personnel in positive contract administration was conducted, as was management training for professional staff of the OCAJ. Both training programs were designed to enhance the skills of management personnel.

As a continuing planning process, a three-year strategy for the Office of the Chief

Administrative Justice was written, and updated based on completed activities. This document formed the basis for the setting of priorities for the staff of the OCAJ, and provides a measure for the accomplishment of these activities.

The Planning and Operations Department is also responsible for the management of the Trial Court's 18 law libraries. During 1981, the Law Library Coordinator worked with three task forces comprised of Trial Court law librarians to develop the first draft of the planning document for the delivery of library service to the Trial Court. After review of the draft by the librarians, the Law Library Coordinator commenced working with departmental liaisons for library service to develop recommendations for legal collections and maintenance procedures with each department. The final document will include minimum standards, policies and procedures and an implementation plan for libraries and legal collections within the Trial Court.

In September, the librarians met together for the second time since reorganization. The meeting included a presentation of the new fiscal procedures which the librarians must follow, a determination that weeding of the collections will be the main objective for 1982 and a review of the planning document.

The Law Library Coordinator completed site visits to all eighteen law libraries to assess current space needs, conditions of collections and problems impeding the delivery of quality library service. The information gathered was used in the planning document and budget preparation.

Other responsibilities of this Department include statistical analysis and public information.

The Court Planner is responsible for the collection, analysis and presentation of statistical data from the seven Trial Court Departments. This information is provided to the Chief Administrative Justice on a quarterly basis and is used to determine case

management policies and personnel assignments.

The public information activities during 1981 included the continued publication of the Trial Court Reporter, the bi-monthly newsletter for Trial Court employees, the publication of the 4th Annual Report of the Chief Administrative Justice and continuing assistance to persons interested in the Massachusetts judicial system.

DATA PROCESSING DEPARTMENT

The Data Processing Department supported the on-line Court Case Management System in Norfolk and Middlesex counties during 1981. This system was used by the Clerks-Magistrates and District Attorneys for the purpose of managing all Superior Court Department cases on the criminal side. Daily calendars were produced from this on-line information system which assisted the courts in the management of their caseload.

Over the course of the year, data was gathered on the status of all pending criminal cases throughout the Superior Court Department with the exception of Suffolk County. Systems were established which regularly gathered information on cases entered and disposed each month and reports were produced on a regular basis from this information base.

On the civil side of the Superior Court Department, the Data Processing Department provided automation in the gathering of all pending cases. The case volume in every county of the Commonwealth was analyzed and collected by the department. Reports were produced monthly on the status of these cases and detailed cases by type and by age.

The Boston Municipal Court Department used an on-line indexing system to replace its existing docket index. During the first week of 1981, the Data Processing Department produced a consolidated plaintiff-defendant index for calendar year 1980 for the Boston Municipal Court Department Clerk-Magistrate

for Civil Business, Michael Coleman. This computer generated index was bound and delivered to the Clerk-Magistrate at a substantial cost savings over the former method of manual typing and printing. The office continued to provide the Middlesex Division of the Probate and Family Court Department with the automated Probation Receipt Accounting System. The system monitors all support payments under supervision by the court, and in addition to producing support payment checks, the system provides a number of reports which aid the probation officers in their responsibility of supervising these accounts. A comprehensive users manual was written for this system which describes the automated processing of payments and which can be used as an instruction guide.

In response to many requests from the Probate and Family Court Department and from the District Court Department, a decision was made to rewrite this system to maximize its transferability to either of these busy departments. The rewriting of this software will be a prime priority of the Data Processing Department during 1982 and is scheduled for completion in June of that year. The Land Court Department received assistance in the preparation of a Request for Proposal for automatic drafting equipment. This equipment is intended to facilitate the production of title business within the Land Court by storing on an automated data base detailed engineering drawings of titled property within Massachusetts. Divisions of property can then be called up from the computer system and redrawn automatically saving substantial labor in that court. The Request for Proposal for hardware and software was issued in the spring of 1981.

The Data Processing Department provided the detailed budget breakdown for use by the Fiscal Affairs Department of the Office of the Chief Administrative Justice during the legislative budget review process. In addition, personnel data on all court employees has been maintained by the Trial Court's data processing system. The personnel data has been used in the preparation of the Trial Court

budget and assists the Office of the Chief Administrative Justice and the administrative departments in their responsibility for supporting personnel management information throughout the Trial Court.

In the fall of 1981, the Data Processing Department was reorganized in an effort to consolidate the systems analysis function of Trial Court management information. It is hoped that this change to the department will improve information systems support to the Trial Court divisions and improve the management of the Data Processing center.

THE MASSACHUSETTS TRIAL COURT

The Massachusetts Trial Court comprises seven departments, each with its own geographic and substantive jurisdiction. The following reports detail the activities of the Trial Court Departments during 1981:

BOSTON MUNICIPAL COURT DEPARTMENT

The Boston Municipal Court Department has undertaken several new initiatives during Fiscal Year 1981 while continuing a number of existing programs.

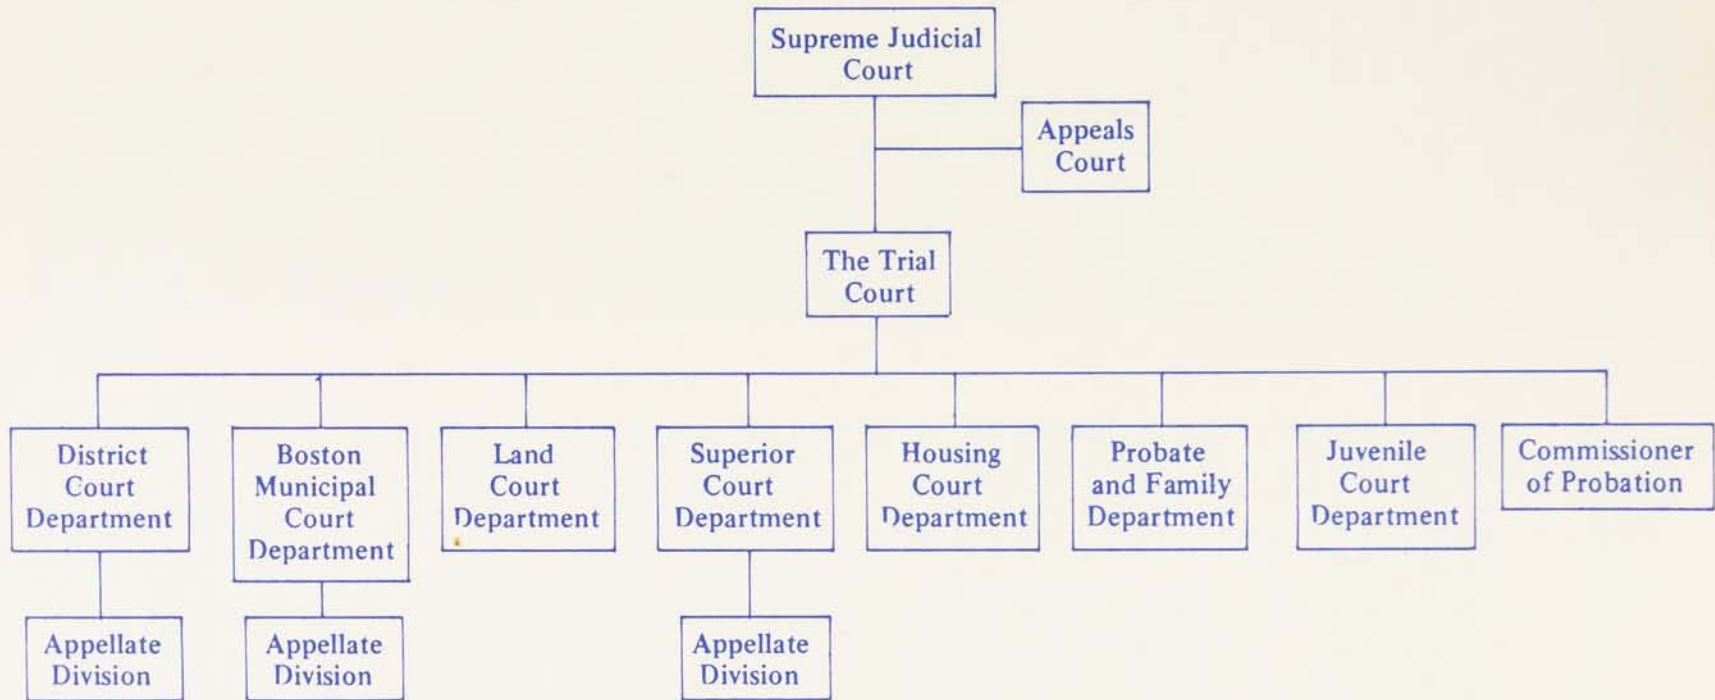

In recent years the justices of the Boston Municipal Court Department have found it necessary to appoint an increasing number of private attorneys to represent criminal defendants who have been found to be indigent. The quality of that representation was found to be inadequate in some instances and led to the establishment, in the spring of this year, of a committee chaired by Justices Burnham and Mulligan, and composed of representatives of the Boston Bar Association and the Massachusetts Continuing Legal Education-New England Law Institute which formulated a Bar Advocacy Training program for attorneys seeking appointment to represent indigent defendants in the Boston

Municipal Court Department. Approximately 150 attorneys signed up for the program. The training sessions began in September and the final group completed its sessions in November. It is the hope of the Justices of this Department that this training program will provide the court and the indigent criminal defendants who come before it with competent and caring counsel.

The parking violations responsibility of the court which had suffered over the past few years because of the lack of personnel and equipment was contracted out earlier this year by way of an agency agreement with the City of Boston. This special effort has resulted in substantially increased revenues in the relatively short period of time it has been in operation.

The Court's Probation Department has undergone a reorganization in an effort to more effectively utilize the limited personnel it has available. A planning grant from the National Institute of Corrections has helped to make this a meaningful undertaking. While reorganization cannot substitute for an adequate staff, it has afforded the Boston Municipal Court Probation Department some relief from the problem of chronic

MASSACHUSETTS JUDICIAL SYSTEM

understaffing. In addition, the Probation Department has agreed to implement and evaluate the Trial Court Automated Probation Accounting System.

The Court's mediation program, a joint project with the Massachusetts Bar Association and Crime and Justice Foundation, continues to prosper, especially on the criminal side of the court. While the acceptance and success rates seem to be running well above the national norms, wider acceptance of the project is being sought on the civil side of the court.

The increased number of appeals and first instance jury trials coming from the nine primary courts in Suffolk County has made it necessary to expand the Department's six person jury operation. Presently, three trial sessions in addition to an assignment session are being utilized. The District Court Department presently has two of its judges assigned to these sessions. The Department is grateful for this support and it is hoped that it will continue.

The Office of the Chief Administrative Justice has designated the Boston Municipal Court Department as a pilot location for implementing the Court Case Management System at the misdemeanor court level.

The Office of the Chief Administrative Justice has also assigned one of five (5) new micro computers to the Boston Municipal Court Department for evaluation.

Judges from this court now serve on Trial Court committees considering reorganization of the interpreter services, the education program and library sciences.

DISTRICT COURT DEPARTMENT

The District Court Department consists of 69 divisions located throughout the state. The Department utilizes the services of 153 Trial Court Justices and 70 Clerk-Magistrates.

One of the major projects undertaken by the District Court Administrative Office during 1981 was the publication of a 48-page Report

on Activities in the District Court Department Since Court Reorganization. Published in April, 1981, the report details many areas of activities in the District Court, and contains a list of all District Court Committees and their membership. Individual copies of the report are available at no charge from the District Court Administrative Office, 209 Essex Street, Salem, MA 01970.

The sixteen (16) divisions of the District Court Department authorized to hold jury sessions are continuing to maintain an excellent record in processing both first instance and de novo criminal cases. These jury sessions have received approximately 1,000 cases per month since the new system became effective on January 1, 1979. Of the cases currently pending, approximately 70% are 60 days old or less, and most of those are under 30 days old. The District Courts are disposing of their jury business promptly, and achieving all of the goals that the Court Reorganization Act contemplated in this area.

Also during 1981, the District Court Committee on Juries of Six published the sixth annual update to its Manual of Jury Instructions for Criminal Offenses Tried in the District Courts. The Manual has become a standard reference document in the District Court jury sessions. The Committee is also studying a number of procedural areas in District Court jury practice with an eye toward greater uniformity in the jury sessions.

The Department has also made considerable progress in reducing the number of pending civil remand cases which are received from the Superior Court Department. The number has been reduced by 38% between January 31, 1981 and June 30, 1981. As of the latter date, only 2,045 such cases remain pending throughout the District Court Department.

A project to improve the paper flow systems in the District Court Department has been initiated to develop a number of basic multi-part forms for use in the District Courts. It is expected that when these forms are completed, their use throughout the Department will reduce the existing clerical

burden associated with case processing.

In order to design systems that are useful and practical, the design process is being undertaken by an Administrative Office staff member, on site at the Barnstable Division. By designing the forms within the courthouse environment, the paperflow and the steps involved in processing cases can be traced with precision, and new forms can be tested before they are promulgated for systemwide use. This is a long term project, but one that holds the promise of improved efficiency and time savings in the Clerk-Magistrates' offices. Progress thus far indicates that the use of modern forms, with relatively simple data processing equipment, can offer substantial assistance to the District Courts in processing its enormous volume of case-related papers.

The use of standards approach to certain aspects of judicial administration in the District Courts dates back to 1973. At that time it became apparent that some vehicle, in addition to statutes and rules, was needed to assist judges in identifying the best ways in which certain proceedings should be conducted. Statutory and rule provisions sometimes create as many questions as they answer, and the growing complexity of legal requirements seemed to demand that means be developed for simplifying the process so that there is greater uniformity in the application of various legal requirements.

The approach that was chosen was the development of volumes of Standards of Judicial Practice, and the creation of a Committee on Standards. Prior to 1981, the Committee on Standards had issued three major volumes, one on the complaint procedure, one on arraignment and one on pre-trial release. (Other committees have developed standards in the areas of caseload management, civil commitments and care and protection cases.) In November, 1981, the Committee on Standards issued its fourth volume, on the trial and probable cause process. These standards contain provisions addressing such issues as prosecution by private attorneys, jurisdiction, conduct of attorneys, trial procedures, procedures at

probable cause hearings and a discussion of the requirements for determining probable cause. This area has become more complicated in recent years as caselaw and the Massachusetts Rules of Criminal Procedure have changed the character of the probable cause hearing. The trial portion of the standards deals with many points of confusion that have arisen from time to time in District Court trial practice.

A new focus has been placed on the enforcement of support orders throughout the District Courts. In December, 1980, Administrative Regulation No. 7-80 was issued by the Administrative Justice of the District Court Department establishing a cycle of mandatory reviews for all support matters and thus maintaining a system of continuing case supervision. During April and May, 1981, five regional meetings were held by the Administrative Justice with all of the Clerk-Magistrates to discuss the use of voluntary agreements and voluntary wage assignments negotiated after probable cause is found at the show cause hearing. Emphasis was placed on the reduction of time lags in each step between the application date and trial date to insure that support orders are issued at the earliest possible time. An entire morning session of this year's District Court Judicial Conference, attended by all District Court Justices, was devoted to issues to be considered in the establishment of support orders, use of wage assignments as an enforcement technique and a discussion of systematic approaches to support cases. In a coordinated effort between the Probate and Family Court Department, Boston Municipal Court Department and the Office of the Commissioner of Probation, the District Court Department also completed six one-day support enforcement workshops for Chief Probation Officers and critical personnel from each probation office. During October, 1981, each probation office also participated in a major national effort to collect past due arrearage monies from absent parents through a cross-match system with the Internal Revenue Service. In addition, two State Troopers have been assigned to provide service on outstanding default warrants in selected District Courts.

Chief Justice Zoll has also recently announced the formation of a District Court Committee on Non-Support, chaired by Honorable John C. Cratsley. The 10 members of the Committee will be reviewing District Court procedures with regard to support cases and preparing Standards of Judicial Practice in this area.

Preliminary indications are that this emphasis has resulted in a measurable increase in monies collected. On April 7, 1981, Louis B. Hays, Deputy Director of the Child Support Enforcement Agency of the U.S. Department of Health and Human Services, presented awards to Governor King and to the Trial Court in recognition of the State's effectiveness in the child support area. During the presentation, Mr. Hays described the cooperative effort between the Judicial and Executive branches as one of the key reasons for the success of the Massachusetts program. He presented plaques to the Governor and to the Trial Court. The latter contained the following inscription: "Commendation award presented to the Trial Court of the Commonwealth of Massachusetts, District Court and Probate and Family Court Departments, in recognition of their contribution to the success of the Massachusetts Child Support Enforcement Program during 1980. United States Department of Health and Human Services, Office of Child Support Enforcement."

Two major continuing education undertakings were organized by the District Courts in 1981. One was a major two-day conference on the family which was attended by all District Court Justices. Many subjects were addressed, including a review of the status of "The Family in 1981", findings in care and protection cases, the law of transfer hearings, the role of the probation service, and non-support cases. In addition, the Justices had the opportunity to discuss procedures and dispositions in hypothetical family cases.

In addition to the family conference, and after considerable discussion and planning with Brandeis University, a program has been launched that offers District Court Justices the opportunity to read literature in the

humanities and relate those readings to their work as Judges. Thanks to the pioneering efforts of the Center for Continuing Studies at Brandeis, a pilot program was offered in September, 1980, for thirteen Judges. Prior to this one-day conference, the Judges read Billy Budd by Herman Melville and The Caucasian Chalk Circle by Bertolt Brecht. The day was spent discussing these works under the leadership of Professor Saul Touster of the Legal Studies Program, Brandeis University, and Professor Richard Sterne of the English Department of Simmons College. The Judges also had the opportunity to discuss their judicial functions with other university faculty members present at the conference. The seminar was intended to broaden the scope of judicial education to include areas that are seldom dealt with directly in court sponsored programs. Seminars such as this give Judges an opportunity to reflect on the judicial function and to discuss issues that they would seldom have the chance to discuss with colleagues.

With the assistance of a grant to Brandeis from the Massachusetts Foundation for the Humanities and Public Policy, this program has now been extended to all of the District Court Judges. Four one-day seminars were held in 1981. Among the works read and discussed at these seminars, in addition to the two mentioned above, were Shakespeare's King Lear, Heart of Darkness by Joseph Conrad, The Stranger by Albert Camus, Noon Wine by Katherine Anne Porter and Benito Cereno by Herman Melville.

One of the consequences of a sentencing conference held in 1980 was the highlighting of the importance of sentencing and the identification of sentencing issues that would warrant further attention. In order to provide a mechanism for the continuing treatment of these issues, the Department's Administrative Justice appointed a Committee on Sentencing consisting of seven Judges. The Committee has a broad agenda and is examining a variety of sentencing issues and plans to issue memoranda from time to time containing suggestions to assist Judges in making sentencing decisions. The first two

memoranda were issued in May, 1981, one outlining the relationship of sentencing practices to the census of places of incarceration, and another containing recommended sentencing techniques in motor vehicle homicide cases. The Committee is aware, however, of the importance of Judges retaining maximum sentencing discretion of individual cases, and is dedicated to the full preservation of that discretion. The Committee is now active in reviewing and analyzing presumptive sentencing bills pending in the Legislature, and is also working on recommended sentencing practices in cases of driving under the influence of liquor.

As a result of legislation passed during the last session, the responsibility for the processing of parking tickets will be placed with the issuing cities and towns rather than the court as of January 1, 1982.

The District Court Department has long had difficulty processing the increasing number of parking tickets issued by cities and towns. Approximately 2.5 million tickets are issued annually. The problem of processing these tickets has been compounded by several factors. The District Court Department as a whole suffers from a shortage of clerical personnel, the more severe the shortage at a particular court location, the lower the priority of the parking function since "real crime" matters must, of necessity, take precedence.

The consequence of this problem was a diminishing amount of revenue to be turned over to the cities and towns.

Under the new legislation, payment for parking violations will be made directly to the city or town, if a violator does not pay, or requests a hearing, the hearing will be held before a town hearing officer. If the violator fails to appear at the hearing, notification will be sent to the Registrar of Motor Vehicles. The registered owner's license to operate and automobile registration will not be renewed until the parking tickets are paid. The entire process is non-criminal. If a person has more than five unpaid parking tickets, however, the

city or town may apply for a regular criminal complaint in the District Court, whereupon the case is treated as a regular criminal matter.

With the court no longer processing parking tickets, it is estimated that over one hundred clerical personnel in the District Courts will be freed for more pressing court business, and increased revenue will be produced by the cities and town for their own treasuries.

The Divisions of the District Court Department have traditionally been viewed as the community courts of the Commonwealth. As such, they are conscious that they be accessible to the community and participate in keeping the community informed about the judicial system as it functions in the local District Court. In furtherance of this objective, the District Courts have for several years been involved in an expansive and successful program to promote better understanding of the law and the court system among school age youth. (The District Court LRE program was featured in the September, 1981 issue of Judicature, the journal of the American Judicature Society.)

Several major law-related education events took place in 1981. The second edition of Courts and the Classroom: A Guide to Law-Related Education Programs Through the Court System, was published. Two thousand copies of the first edition of this 190-page book have been distributed to school superintendents, principals, court personnel, classroom teachers and law-related education program personnel. A duplicating packet of materials accompanies the book, enabling teachers to copy activity and information sheets for their students. In addition, the Courts and the Classroom Newsletter continues to be published quarterly by the District Courts in cooperation with the Massachusetts Association for Law Related Education. The newsletter reaches nearly 3,000 educators and legal professionals in Massachusetts and across the country, and serves as a clearinghouse of program information and ideas.

Perhaps the most exciting law-related education event in the District Courts was the completion of an 18-minute film entitled "Preserving Your Rights . . . and Those of Your Neighbor." The film was a joint project of the District Court Administrative Office and the Polaroid Corporation. It is an introduction to the Massachusetts District Court system, and shows how a seemingly simple "fender bender" accident can involve youth in criminal, juvenile and small claims court. The film was first shown at a reception for film participants at the Supreme Judicial Court. Later it was introduced to several hundred court and school personnel at an afternoon showing and reception at the John Hancock Mutual Life Insurance Company. Copies of the film were obtained for each District Court and were distributed in October at an all-day seminar that addressed the issue of how to make the best use of the film. The film may be borrowed at no charge from any District Court.

Notwithstanding the many positive strides which are described above, the District Court Department is not without a number of continuing difficulties.

One is the inadequacy in numbers of clerical and administrative personnel. A few of the District Courts utilize electronic data processing. However, the overwhelming volume of case processing and record keeping is still performed manually. One response to this reality must be better management and the development of improved paperwork systems that limit the number of typing and other clerical actions that must be taken in a case. Such systems will not fully address a problem that can only be solved by employing additional clerical personnel, however. The need for such personnel varies from place to place, but additional clerical assistance is needed in a great many District Courts. Enough courts are having significant difficulties in the timely processing of case-related paperwork to warrant the designation of this problem as an urgent matter.

The matter of transportation of prisoners must also be addressed. In most District Courts,

prisoners are transported to and from places of incarceration by Court Officers, who often utilize their own vehicles. This practice began in earlier, less turbulent times when the criminal cases heard in the District Courts were neither as serious nor as numerous as they are today, and has developed over the years with little coordination or concern as to how prisoner transportation was accomplished or why it was being done by Court Officers at all. The District Courts are fortunate that there have not been more instances of escapes and injuries, and that the Court Officers have performed these duties so adequately in the face of risk potential. The manner of transporting prisoners in the District Courts is a relic of a bygone era and must be improved significantly. The related problem of security also requires attention, particularly in courts with only one Court Officer and in those areas that have encountered significant population growth.

HOUSING COURT DEPARTMENT

The Housing Court Department consists of two divisions: the City of Boston Division and the Hampden County Division. The Department has civil and criminal jurisdiction concurrent with the District Court Department and the Superior Court Department in housing related matters arising in the City of Boston and in Hampden County. While both divisions have identical subject matter jurisdiction, the nature of cases filed in the two divisions differs somewhat.

The Boston Division is an urban housing court which hears a high volume of cases dealing with housing code violations and landlord tenant issues, while the Hampden County Division is an urban, suburban, and rural housing court which hears, in addition to these matters, a large volume of contract and tort actions involving residential property.

In Fiscal Year 1981, the Hampden County Division showed a 26% increase in cases filed over Fiscal Year 1980, up once more over the 15% increase shown the previous year. These cases generated nearly \$75,000 in fees

returned to the Commonwealth. The total number of cases filed in 1981 was 7,350.

These numbers do not reflect the 224 civil trials, jury and jury-waived, held by the Court during Fiscal 1981, plus the 617 other motions, restraining orders, attachments, and arraignments for a total of nearly 13,000 court docketed matters.

In addition, the Hampden County Division dealt with many cases, involving large numbers of apartments, which required repeated inspections and continuing supervision by the Housing Specialists, as well as collection by the Clerk's Office for rental payments, issuance of receipts, maintenance of payment records, and payments to tradesmen, reparimen, utility companies, fuel dealers, and others.

These specialized services were highlighted by the rescue of 124 apartments owned by a bankrupt landlord in 11 buildings located throughout the city, the Court assumed operation of these units until a Federal assumption and rehabilitation grant could be approved for the City of Springfield's Neighborhood Grant Program.

There were an estimated 22,000 telephone calls during the year, from all over the four western counties, and an equal number of people who came in person, seeking information regarding the statutes governing landlord-tenant and housing law.

In addition, the large numbers of persons who appear pre se in Housing Court once again added to an increasingly heavy burden on court personnel.

In the City of Boston Division, the number of cases filed decreased slightly from the previous year, but the total number of hearings increased dramatically, producing an increasing burden on a decreasing staff. During FY 1981, \$93,045 in fees, fines, and costs were returned to the Commonwealth.

Of the 3,733 criminal show cause hearings scheduled, nearly twenty-five (25) percent

complaints which were filed pro se by tenants and landlords. The remaining complaints were filed by the Department of Inspection Services (Housing Inspection Department and Building Department), Fire Department, and Department of Public Health, and the Boston Environmental Health Improvement Program.

In addition to the 3,733 show cause hearings, there were 4,800 utility warrant hearings held in Fiscal Year 1981. That figure represents an increase of nearly 100% over Fiscal Year 1980.

Caseflow management techniques continued to be refined during Fiscal Year 1981. The goal of maximizing the judicial resources of the court in a manner which is fair to the parties and does not result in a backlog requires the cooperation of judges and clerks, prosecutors, and attorneys, and non-judicial support personnel. For many reasons, caseflow is not constant but is, rather, dynamic and continuing attention must be given to its management and to the coordination of the various elements necessary to the scheduling of trials and movement toward final disposition. To ensure this coordination, an assistant clerk has been designated the responsibility to schedule all cases. This assistant clerk/scheduler has complete control of scheduling and actually retains possession of the trial books used in scheduling cases. Frequently trial dates are assigned in consultation with, and in the presence of, the parties or their attorneys. Subsequent notices are sent confirming trial dates. Interdepartmental, record control has been improved through the use of cards which must be filled out by court personnel wishing to remove a case file from its designated location. The cards identify the borrower, the reason for requesting the file, and the date returned. This has substantially reduced the temporary misplacement of papers so common to small high volume courts.

It is estimated that approximately 35,000 telephone inquiries were received by the staff of the Boston Division during FY 1981. These inquiries from landlords, tenants, attorneys, and both local and national organizations are a

vital part of the court's daily operation. In order that the staff be prepared to give accurate and up-to-date information, not only on the telephone, but to the many people who walk into the court requesting information, weekly seminars and training sessions have been implemented by the Clerk/Magistrate. Members of the Housing Court staff who are attorneys provide regular in-service education covering major topics relating to landlord-tenant law.

JUVENILE COURT DEPARTMENT

The Juvenile Court Department consists of four divisions: Boston, Bristol County, Springfield and Worcester. The Divisions, within their territorial jurisdiction, have exclusive jurisdiction over all cases of delinquency, C.H.I.N.S. (Children in Need of Services), and care and protection petitions. Elsewhere in the Commonwealth, the local divisions of the District Court Department exercise similar jurisdiction through their juvenile sessions. The Divisions of the Juvenile Court Department further exercise jurisdiction over all de novo appeals of juvenile cases within their respective counties.

Prior to Court Reorganization, the Juvenile Court Divisions in Boston, Bristol County, Springfield and Worcester were four individual courts, each operating with totally different individual policies and procedures and some more constrained by locally restricted funding than others. Juvenile sessions in the District Courts were also conducted with varying rules and procedures. With Court Reorganization, the Administrative Justice of the Juvenile Court Department is authorized to establish rules and procedures which will apply to the Juvenile Court Divisions and the juvenile sessions of the District Court Department.

During the past year, the executive and legislative branches of government studied many of the needs of court-involved children and their families. The Juvenile Court Department staff participated extensively in this process, and many of its recommendations were incorporated into the report of the

Governor's Task Force on Juvenile Justice.

The Department's Rules Committee and its various sub-committees, which include professionals from all disciplines involved in juvenile matters, are reviewing original sub-committee drafts, finalization of which have been purposely delayed pending changes in legislation that may result from the recommendations of the Task Force.

In conjunction with its judicial authority, the Department has instituted and maintained many court and community based programs to assist juveniles involved in proceedings before the Court. These programs involve rehabilitation and retraining for juveniles as well as court clinics which offer psychiatric and psychological assistance to the children referred by judges or probation officers. The Juvenile Court Department has also developed a network of highly specialized and comprehensive services to aid neglected or abused children. In response to the reductions of staff in the Boston schools, the Department, through its probation staff, is developing an out-reach program to service truant children and prevent their future involvement with the criminal justice system.

The Department has continued its ongoing, in-service training programs for its own personnel and some agency personnel providing court support services. Court appointed investigators have been trained in the area of the Court's policies and procedures regarding abused and neglected children. Similar programs have been developed for hospitals, lawyers, and social service staff, as well as public health and visiting nurses.

The Department continues its student training program which provides field work experience to graduate and undergraduate students in such fields as social work, counseling, education, law, medicine, religion and recreation.

Staff continued to accept speaking engagements before various medical, legal, social and other community and child advocacy groups as part of the Department's

commitment to the education of the public in the area of children's needs and the role of the Court in addressing those needs.

On a continual basis, staff from all levels of the Department serve on various judicial and legislative committees whose purpose is to improve the delivery of services to children and their families.

The Department has maintained its "Emergency Judicial Response" system which was established in 1978 to provide the availability of judicial intervention on a 24-hour-a-day, 7-day-a-week basis for emergency situations. The system has been expanded to all the divisions of the Department, and a proposal has been submitted to the Supreme Judicial Court for possible implementation on a statewide basis.

The Juvenile Court Department deals with matters which are unique in jurisprudence. The refinement and application of the Juvenile Court concept has constantly struggled within itself to equitably balance the rights of troubled children and families with the need of society to provide beneficial assistance and direction to those of its members who will, as adults, be responsible for the affairs of the nation.

LAND COURT DEPARTMENT

The Land Court Department, due to the problems facing the economy, is faced with an increased case-load, especially in the fields of tax and mortgage foreclosures.

Despite this increased case-load and personnel problems, the Department is still able to maintain a relatively short trial list. This is due in great measure to a practice adopted last year of periodically reviewing the dockets, listing all contested cases, and assigning them to a "call of the list" for a specified date. These sessions often can either result in settlement of the case or, at least, agreements among counsel as to evidence and testimony to be introduced at the subsequent hearing, which is ordinarily

held within a month.

One of the cornerstones of the Court Reorganization Act, and one of the main reasons for the creation of a unified Trial Court, was the ability to transfer cases among the various departments of the Trial Court. Many cases have been transferred from the Superior Court Department to the Land Court Department during the past year, either to become Land Court Department cases if jurisdiction permits, or if it does not, to be heard and disposed of by the Justices of the Land Court Department sitting as Superior Court Department Justices. It is hoped that this has aided the Superior Court Department in reducing its trial list.

In addition to efforts to shorten the trial list, the Department is continuing to work closely with the Commonwealth's twenty-one Registers of Deeds, who, by statute, serve as Assistant Recorders of the Department. Conferences and seminars are held annually at the Department's Administrative office to discuss problems encountered by these officials in the various Registry Districts, and one of the Department's Law Clerks has been designated to serve as a liaison between the Department and these Assistant Recorders in answering whatever questions they might have as to Land Court Department policy and procedure as they relate to the performance of their duties.

Legislation which would result in the adoption by the Department of the Massachusetts Rules of Civil Procedure was filed but not enacted by the Legislature. This legislation will be filed again in the hope that it will be enacted in the near future. At the present time, the Rules of Civil Procedure are applicable to some but not all of the cases within the jurisdiction of the court, making matters confusing both for court personnel and for parties and counsel appearing before the court.

The Department's increasing caseload is due, in part, to an increase in the number of foreclosures, and is also caused by an increase in the number of subdivisions and condominium

conversions involving registered land. Both of these procedures involve exacting and time-consuming work by the Court's Engineering Department.

PROBATE AND FAMILY
COURT DEPARTMENT

The Probate and Family Court Department, which consists of fourteen divisions, has jurisdiction over family law matters such as divorce, custody, support, alimony and enforcement of court orders. Its jurisdiction also includes probate actions: wills, administrations, trusts, adoptions, guardianships, etc. It has general equity jurisdiction, whose importance has grown in recent years due to the emerging black-letter law on medical treatment of incompetent individuals.

In 1981, the Department set out to make the most effective use possible of the new tools which were provided through the cooperation of the Office of the Chief Administrative Justice, the Legislature and the Governor. These tools took the form of five new judgeships and twenty-five additional employees to work on the Title IV-D support enforcement program.

The new justices have been utilized initially to mount assaults on the backlog of cases in Bristol, Essex, Middlesex, Worcester and other divisions. The additional sessions made possible by the assignment of these justices have brought a marked decrease in trial delay in some divisions, especially Essex and Middlesex. Reductions in delay due to continuation of these sessions should materialize in the other targeted divisions soon.

For the long-term perspective, the Administrative Justice appointed a Case Flow Management Committee which consists of three justices from the Department. The Committee has systematically visited each division, and held discussions with the Justices, the Register, Probation personnel, trial-assignment personnel and local bar representatives. The review covered many

facets of court operations: trial delay and case backlog; trial assignment systems; calendaring systems; registry operations; personnel allocations and facilities.

The Committee submitted a report for each division to the Administrative Justice with recommendations. The Administrative Justice will review the reports and will work with each division to implement any needed changes. It is anticipated that a compendium of the findings and recommendations for each division will then be prepared by the Administrative Justice for submission to the Supreme Judicial Court and Office of the Chief Administrative Justice. This summary will include long-range plans for the effective use of judicial resources in the Department.

The additional clerical assistance provided for the Title IV-D program was put to good use in 1981 to handle the rapidly increasing support payments supervised by the Family Service Offices in the various divisions. Collections under the program, for which 75 percent of all costs of collection and enforcement are reimbursable to the general fund by the federal government, reached \$25,000,000 in Fiscal 1981. This figure is \$5,000,000 higher than collections for the previous Fiscal Year.

The work of the Probate and Family Court Department in collecting support payments was recognized by the Child Support Enforcement Agency of the United States Department of Health and Human Services. The agency's Deputy Director, Louis B. Hays, presented a plaque, on behalf of the agency, to the District and Probate and Family Court Departments ". . . in recognition of their contribution to the success of the Massachusetts Child Support Enforcement Program . . ."

In the upcoming year, the Department will be focusing on these and other initiatives, including the use of automation in record keeping and case management.

SUPERIOR COURT DEPARTMENT

During calendar year 1981, the Superior Court Department initiated a variety of new programs.

With the technical support of the Trial Court Data Processing Department, the Superior Court Department has completed automating certain civil case data in each Clerk of Court's office. Automated civil indexing of each pending civil case by docket number, entry date, case type and plaintiff/defendant identifiers gives the court a valuable information tool which provides for the most effective matching of judicial resources to pending caseloads. This enormous data base which includes case information on almost 70,000 pending civil cases is updated monthly. In an effort to facilitate the updating of this data base, a Civil Action Cover Sheet (a three-part form) is prepared by plaintiffs' attorneys and filed with the case papers. The top sheet is forwarded directly to the data processing department by the clerk's office, the bottom sheet remains with the case papers and the middle sheet is forwarded to the data

processing department when the case is disposed.

Again, with the technical support of the Trial Court Judicial Data Processing Department, the Superior Court has undertaken the task of automating the criminal side of the court. It is anticipated that all fourteen counties will be completed by the end of calendar year 1981. Administrative Justice Lynch has issued a **STANDING ORDER** to the Regional Administrative Justices directed at ensuring compliance with Mass. R. Crim. P., Rule 36, the so-called Massachusetts Speedy Trial Rule which requires that criminal matters (with certain exclusions) be disposed of within twelve months of return day.

The successful program of regional administration, started in January, 1980, has continued to strengthen the management component of the Superior Court during calendar 1981.

Five regions have been established and administered by a Regional Administrative Justice as follows:

REGIONS	COUNTIES
----------------	-----------------

Region I	Suffolk Norfolk
Region II	Middlesex Essex
Region III	Plymouth Bristol Barnstable Nantucket Dukes
Region IV	Worcester
Region V	Hampden Hampshire Franklin Berkshire .

REGIONAL ADMINISTRATIVE JUSTICES

Honorable Henry H. Chmielinski

Honorable Francis John Good

Honorable Francis W. Keating

Honorable Herbert F. Travers, Jr.

Honorable George J. Hayer

While continued centralization of some management functions quite properly belong in the Administrative Office, many such functions are better performed at the local level (for example, assignment of capital cases and appointment of a single justice to sit and convene a medical malpractice tribunal). Each Regional Administrative Justice is delegated responsibility to manage and coordinate the efforts of other justices, clerks, prosecutors, probation officers and the bar to achieve as smooth a continuous flow of court business as is possible.

The Secretary of State for the Commonwealth had requested Superior Court assistance on election day, November 10, 1981, for voters who might encounter difficulties in exercising their right to vote. In accordance with this request, a justice and clerk in each county were available after regular court hours to hear emergency voting matters.

In 1981, the Superior Court Department completed its seventh Judicial Internship Program. This program allows law students from each of the area law schools the opportunity to work closely with the participating justices and to observe actual court proceedings. Additionally, seminars were conducted to encourage informal and candid discussions amongst students, justices and distinguished trial attorneys.

STATISTICAL APPENDIX

THE BOSTON MUNICIPAL COURT DEPARTMENT

Criminal Caseload

In Fiscal Year 1981, 26,146 matters were initiated in the Criminal Business Division of the Boston Municipal Court Department. Twenty-five percent or 6,536 of these matters were decriminalized motor vehicle violations. The remainder were criminal complaints.

Of the total 19,610 criminal complaints entered in the Boston Municipal Court Department, 31.8% were criminal motor vehicle complaints; .2% were complaints involving domestic relations; and 68% were recorded under a general, all other criminal complaints category.

While Fiscal Year 1981 decriminalized motor vehicle violations were down 30% from the Fiscal Year 1980 entry level, criminal complaints, in general, increased by 10% or 1,862 complaints. Increases in criminal complaints entered were reported for criminal motor vehicle complaints, up 2%, and the general, "other" complaint category, which accounts for over 50% of the total criminal division activity, up 15% over FY '80. Domestic relations complaints, which comprise less than 1% of the total business, decreased by 16 complaints.

For 9,999 pending criminal complaints, the defendants charged were not under arrest while awaiting trial - a 33% increase over FY '80.

Total complaints tried by the Boston Municipal Court Department in FY '81 reached 9,863, 4% fewer than in Fiscal Year '80. Ten percent of these complaints were disposed of on a guilty plea by the defendant. The remaining 8,854 complaints were disposed of at trial. The considerable drop in guilty pleas recorded in the past two years in the Boston Municipal Court Department is directly traceable to the decriminalization of several less serious motor vehicle related offenses which accounted for a large portion of the guilty pleas reported in this category prior to January 1, 1979.

A count of the not guilty pleas entered during the past five fiscal years shows that while up significantly from FY '77, guilty pleas have remained relatively constant over the past four years.

Of the 9,863 complaints tried by the court, 40% were placed on file, dismissed, etc., 19% were placed on some form of probation, 13% were fined, 9% were acquitted, 6% were bound over to the grand jury, and the remaining 13%

were distributed among the remaining 8 disposition categories.

Jury-of-Six Caseload

The Boston Municipal Court Department began FY '81 with 288 defendants awaiting trial. During the next 12 months, 1,996 additional requests for jury trials were received, an average of 166.33 requests per month. Thirty-three percent of these requests originated in the Boston Municipal Court Department, while 67% were received from the eight District Court Department Divisions within the limits of the City of Boston.

Twenty-six percent, or 522, were requests for a jury trial in the first instance. The remaining 1,474 requests were for appeals de novo.

During the fiscal year, 41 appeals were withdrawn, 2% of the total requests, bringing the net jury trial requests for the year to 1,955.

Total Fiscal Year 1981 caseload - pending plus commenced - equalled 2,284 requests.

There were a total of 1,507 dispositions reported for FY '81. Thirty-three percent of these dispositions were the result of a guilty plea, 43% were disposed of after a bench trial, 8% after a jury trial and 16% by other means of disposition.

Two hundred and seventy-one defaults were entered for defendants failing to appear for trial.

At the close of the fiscal year, 465 defendants were awaiting jury-of-six trials in the Boston Municipal Court Department, 177 more than at the start of the fiscal year.

Throughput or the ratio of disposition to entries for the Boston Municipal Court Department in FY '81 was 77%, i.e., there were 77 dispositions for every 100 jury requests.

Eighty-eight percent of the defendants pend-

ing at the end of the fiscal year had been waiting trial for 90 days or less. Ninety-six percent had been waiting for four months or less.

Non-Criminal Caseload

Figures for 10 separate non-criminal categories are reported for the Boston Municipal Court Department. These include 9 case categories and a count of the inquests held during the year.

Total non-criminal actions initiated in the Boston Municipal Court Department in FY '81 equalled 24,948. This is down 8,177 actions or 25% from the 33,125 actions entered in FY '80.

Total dispositions of non-criminal actions were also down in FY '81. A decrease of 10% or 1,905 dispositions from the FY '80 level brought the FY '81 total to 16,708. Throughput or the ratio of dispositions to entries for Fiscal Year 1981 for all non-criminal matters was 70%, up from 55% in Fiscal Year 1980.

Civil case entries, which comprise 80% of the total non-criminal caseload decreased 27% or 7,543 entries from the FY '80 volume. This 20,042 case entry total is the lowest volume of the past six fiscal years. The 13,973 civil dispositions recorded in FY '81, 7% fewer than in FY '80, brought the civil case throughput to 70%.

Small claims, the second largest case type volume, 10% of the total entries in FY '81, were also down 3% from the FY '80 case entry level. Only 3% of these Fiscal Year 1981 small claims entries involved motor vehicle property damage cases. Small claims dispositions showed a 40% decrease from FY '80 to 917 total small claims dispositions in FY '81.

Supplementary process cases initiated subsequent to a small claims action, were up 31% or 150 entries over FY '80. Similarly, dispositions of this case type increased 24%

over last year. The transaction of supplementary process cases following a civil action were down 25% or 307 entries and up 22% or 93 dispositions in FY '81.

Taken together, small claims and civil case related supplementary process case entries accounted for 6% of the total FY '81 caseload in the Boston Municipal Court Department Non-Criminal Division.

The remaining 4% of the non-criminal caseload is distributed over 5 casetype categories. With the exception of victims of violent crime cases, entries were down from FY '80 levels. Of particular note is the decrease in cases transferred from the Superior Court Department under G.L.c. 231, section 102C. Entries in this category have dropped from 2,953 in FY '79 to 610 in FY '80 to 256 in FY '81.

Additional information is provided in the charts and graphs which follow and from the Boston Municipal Court Department Administrative Office.

THE DISTRICT COURT DEPARTMENT

Criminal-Decriminalized Caseload

In Fiscal Year 1981, a total of 612,249 criminal complaints were filed in the 69 divisions of the District Court Department. The largest segment of these complaints, 64%, involved motor vehicle related offenses, while the remainder included all other offenses against person, property or the public order.

In total, Fiscal Year 1981 criminal complaint filings were down 7% from the FY '80 entry volume, the third consecutive decrease recorded in as many years. While non-motor vehicle related criminal complaints have been increasing in the past few years, up 6% in FY '81 alone, criminal complaints involving motor vehicles have been on the decline. The FY '81 motor vehicle complaint volume of 391,912 is down 13% from last year and down 34% from the volume of two years ago.

This decline in motor vehicle criminal complaint filings and the corresponding three year decrease in criminal complaint dispositions is the result of the decriminalization of certain, less serious, motor vehicle violations.

In effect, as of January 1, 1979, all motor

vehicle violations (excluding parking) for which the maximum penalty does not exceed \$100 for the first offense and does not carry with it a penalty of imprisonment are classified as decriminalized offenses. While decriminalized violations reduce the demand for bench time, they still require processing by clerk-magistrate and staff and therefore have not constituted a decrease in the workload of that office.

In FY '81, the first year for which complete figures are available, 539,241 citations were returned to the courts from the various police authorities throughout the state. Payments of fines were received on 307,608 citations. A total of 56,642 clerk-magistrate hearings were requested to contest a motor vehicle citation. Failure to pay fines resulted in the issuance of 204,731 criminal complaints with a final disposition of 97,052 such complaints reported.

Parking Violations

Parking tickets returned to the District Court Divisions from various police departments throughout the Commonwealth increased slightly, 1%, in Fiscal Year 1981, after a decline last year. Total returns for FY '81 equalled 2,634,004 tickets statewide.

Tickets paid also increased by 1%, totaling 1,053,866 in FY '81. This figure is equal to 40% of the total number of tickets issued.

Complaints issued on unpaid parking tickets decreased by 24% from 918,371 in FY '80 to 696,573 complaints issued in FY '81.

Activity by the District Court Divisions in collecting unpaid parking tickets was, in general, down in FY '81.

The final category, the disposition of complaints issued on unpaid parking tickets also decreased in FY '81, down 21% from the FY '80 level.

Jury-of-Six Caseload

In Fiscal Year '81, there were sixteen District Court Department Divisions in fourteen counties receiving jury requests from sixty-nine locations.

On July 1, 1980, the start of the fiscal year, there were 1,669 jury requests from as many defendants awaiting action in the District Court Department. During the next twelve months, there were an additional 13,015 requests bringing the total year's caseload to 14,684. Six percent or 913 of this total was eliminated from the caseload upon the defendant's withdrawal of appeal.

In addition to these 913, 11,521 jury requests were disposed of during the year. Pending defaults were increased by 469. At the close of the fiscal year, the District Court Department reported 2,007 defendants awaiting a jury trial after request.

Of the 13,015 trial requests received during FY '81, 44 percent were requests for a jury trial in the first instance, while 56% were appeals for trials de novo. Four percent of the total involved Juvenile Delinquency or Children in Need of Services (CHINS) cases, while the bulk were adult criminal matters.

Of the 11,521 dispositions entered during FY '81, 42% were disposed of on a guilty plea, 16% after a jury trial, 13% after a non--jury

trial and 29% by other means of disposition.

The ratio of dispositions to new requests for FY '81 was 89%. The ratio of dispositions to total caseload for the year was 79%. Both indicate a degree of efficiency in the processing of jury requests in the District Court Department.

Despite a 338 case or 20% increase in the pending caseload by the end of the fiscal year, 89% of the pending caseload had been pending for 120 days or less.

Non-Criminal Caseload

Total non-criminal matters initiated in the District Court Department were down for the second consecutive year. The 263,903 matters filed in FY '81 was 11% below the FY '80 level.

Similarly, the disposition of non-criminal matters brought before the divisions of the District Court Department has declined for the past two years, also decreasing by 11% to 161,603 in FY '81.

The overall ratio of dispositions per entries has remained close to constant at 161%.

Three casetypes - Small Claims, Civil and Supplementary Process - comprise 89% of the total caseload. The largest segment, small claims cases, comprises 45% of the total non-criminal actions initiated and 46% of the actions disposed of in the District Court Department in FY '81. The 118,430 small claims cases entered in FY '81 indicates a slight, .5%, increase in activity, while dispositions for this category were down 7%.

Civil cases comprise the next largest segment of the District Court Department's non-criminal caseload - 22% of total entries and dispositions. Both entries and dispositions were down considerably, 23%, from FY '80 volumes.

The third largest case category, supplementary process, also declined in both

entries, down 15%, and dispositions, down 13%.

Additional figures for these and the remaining six casetypes are provided in the charts which follow.

Juvenile Caseload

The District Court Department receives three types of juvenile related cases: Delinquency Complaints, Applications for Children in Need of Services (CHINS) and Care and Protection Cases.

In total, juvenile delinquency complaints decreased by 7% in FY '81 from the FY '80 case entry level. Motor vehicle related juvenile delinquency complaints, 24% of the total, decreased by 16% to 8,279 in FY '81. The remaining delinquency caseload, 26,572 complaints, is up 973 complaints from last fiscal year.

Dispositions of juvenile delinquency complaints are down 3,117 complaints or 11% from the FY '80 level. Dispositions for FY '81 equalled 72% of new entries for the year.

Children in Need of Services (CHINS) applications decreased by 448 or 14% in FY '81 after a 20% increase in FY '80. Both petitions issued and petitions disposed of in FY '81 were up slightly, 2%.

Finally, care and protection cases received in the District Court Department, 1,017 in total, were down 18% from the FY '80 level, while dispositions, increased by 21% to 813.

Additional data with similar breakdowns for each division are provided in the charts which follow. Further information is available from the District Court Department Administrative Office.

THE HOUSING COURT DEPARTMENT

New cases entered in the Housing Court Department in Fiscal Year 1981 totaled 15,457. This is an increase of 4% over FY '80, a 29% increase over the total case entry figure of five years ago, and the fifth consecutive case entry increase in as many years.

The Departmental caseload is broken down into four case categories. Sizable increases were recorded for two categories.

The largest case category, 39% of the total caseload, is summary process. Entries in this category have increased by 50% from FY '77 levels and 12% from FY '80. The increase has been consistent over each of the past five years.

The second increase was reported in the small claims category, up 49% from FY '77 and 16% from FY '80.

One year decreases of 4% and 12%, respectively, were reported for criminal and civil entries in Fiscal Year 1981.

The Boston Division, which accounts for 55% of the total Departmental caseload, reported decreases in all four case categories for FY

'81 when compared with FY '80. Total entries, while down 6% from FY '80, were still 7% above 1977 levels.

The Hampden Division reported a 21% increase in entries in FY '81 over FY '80. Increases were reported in three of four case categories. Sizable increases were recorded in summary process, up 30%, and small claims, up 23%.

Of note are the long-term increases in entries in the Hampden Division. Summary process and small claims case entries increased by 78% and 165%, respectively, since Fiscal Year 1977.

THE JUVENILE COURT DEPARTMENT

A count of judicial determinations, that is, a count of all actions brought to the court for determination in all cases open during the fiscal year, is used as a relative indicator of the volume of court activity in the Juvenile Court Department. Due to the nature of the Department's workload, cases are kept open and under court supervision to insure that the objectives of the court's decisions are being attained. For this reason, one case may require a significant amount of departmental activity which may not be adequately reflected in a simple count of entries and dispositions.

In Fiscal Year '81, the four divisions of the Juvenile Court Department reported a total of 69,374 judicial determinations. This figure reflects a 7% decline from the FY '80 level. This marks the first break in the trend toward a steady increase in activity over the past several years.

Two divisions, Boston and Bristol County, reported a drop in judicial determinations while the Springfield and Worcester Divisions reported increased judicial activity for the fiscal year.

For Boston, Bristol and Worcester, these

changes indicate a break from the workload patterns established in recent years.

A five year review of judicial determinations reveals a steadily increasing caseload, and, while slight, the 1% decrease experienced by the Boston Division does break this trend. The 17% decrease in judicial determinations reported by the Bristol Division is a significant deviation from the increasing volume of business reported since FY'77.

The Worcester Division, with an 8% increase in judicial determinations has also experienced a reversal of its five year trend which had shown a steadily decreasing caseload since FY'77. The Springfield Division also reported a modest 2% increase in judicial determinations for Fiscal Year 1981.

While the decrease reported for the Boston Division was slight, less than 1%, the 17% decrease recorded in the Bristol Division represents a significant change in the volumes reported in of the past five years.

Both the Worcester and Springfield Divisions reported increases, 8% and 2% respectively, in Judicial Determinations for Fiscal Year '81.

In terms of new cases initiated during Fiscal Year '81, four categories were reported.

The first is titled Juvenile Criminal and refers to juveniles adjudicated adults and bound over for trial in the Superior Court Department. In Fiscal Year '81, 35 juveniles were so charged. Two fewer than were charged in Fiscal Year '80.

Over half of these cases, 19, emanated from the Boston Division of the Juvenile Court Department. This is an increase of fourteen complaints over the FY '80 division level.

Springfield Division, which accounted for 26 of 37 bindovers reported in Fiscal Year '80, dropped to 11 in FY '81. The remaining 5 bindovers for FY '81 were reported by the Worcester Division.

Juvenile Delinquency complaints, the largest case category, were reported at a total volume of 9,936 for FY '81, down 4% from FY '80.

The Bristol Division, the only division with county-wide jurisdiction, accounted for 51% of the total Juvenile Delinquency caseload in FY '81. It, along with the Springfield and Worcester Divisions, reported minor reductions in this casetype, while the Boston Division reported a 199 complaint or 13% increase.

A total of 1,660 Children in Need of Services (CHINS) cases were initiated in the Juvenile Court Department in FY '81. Down 10%, in total, from FY '80, increases in CHINS activity were recorded in the Worcester and Springfield Divisions.

A total of 33 cases initiated in FY '81 involved adults charged with contributing to the delinquency of a minor. These cases, 4 less than reported last fiscal year, are listed under the category of Adult Complaints. The Boston and Bristol Divisions account for the bulk of these entries each year with the Boston Division complaints comprising the major portion in each of the past five fiscal years.

The fourth case category reported by the Juvenile Court Department is Care and Protection. In Fiscal Year '81, 417 complaints involving the care and protection of 723 children were brought before the court. This is 30% fewer complaints involving 45% fewer children than in Fiscal Year '80. A decline of similar magnitude was reported separately for each of the four Juvenile Court Department Divisions.

Appellate Division statistics also reflect caseload fluctuations. In total, Juvenile Court Department Appeals decreased by 73 or 17% from the 437 appeals filed in FY '80. While Juvenile Delinquent case appeals decreased by 107 or 32%, Care and Protection appeals increased by 34 or 33% over FY '80.

THE LAND COURT DEPARTMENT

The Land Court Department began Fiscal Year '81 with 16,156 cases pending. During the course of the fiscal year, 8,919 cases were initiated, and 7,044 cases were disposed of by the court. For every 100 cases entered during the year, 79 cases were disposed of. This compares with 82% for last fiscal year. The Land Court Department closed out the fiscal year with 18,031 cases pending, a 12% increase over the FY '80 end pending level.

Case entries in the Land Court Department, in general, increased only slightly, 1%, over the case entry volume of Fiscal Year '80, and they have increased moderately, 11%, from five years ago.

Within the past five fiscal years, case entry volumes for three of the four Land Court Department casetypes have fluctuated around current levels. A fourth casetype, tax lien cases, have increased consistently. Up 9% in this fiscal year alone, tax lien case entries have more than doubled in the past five years; increasing from 16.3% of the total entries in fiscal year '77 to 32.3% of total entries in Fiscal Year '81.

The steady increase of this one casetype in each of the past five fiscal years is

attributable to several factors. Chief among these is the cycle of real property abandonment in older neighborhoods in cities and towns throughout the Commonwealth. Subsequent shortfalls in municipal tax revenues have caused municipalities to move more aggressively to collect back taxes and restore properties to a revenue producing status. The result has been a steady increase in tax lien cases.

In response, the Land Court Department has moved aggressively to meet this demand by disposing of 22% more tax lien cases this fiscal year than in the previous fiscal year.

Tax lien case dispositions having increased in each of the past five years, also more than doubled over the Fiscal Year '77 level. This one casetype, comprising 15.7% of Fiscal Year '77 dispositions, increased to 31% of the total Fiscal Year '81 dispositions.

Disposition rates for land registration cases, including both confirmations and subsequent actions, by and large, kept pace with case entry rates for the fiscal year, thereby resulting in only minor changes to the pending land registration caseload levels.

The final case category, equity and miscellaneous, did show a 13% growth in the pending caseload during the fiscal year. While cases entered in the equity and miscellaneous category have declined consistently in each of the past four fiscal years, disposition rates for this case category have also declined with significant drop during Fiscal Years '80 and '81.

In general, plans prepared by the Engineering Division of the Land Court Department were down for the third consecutive year. While the production of Decree Plans have increased in each of the past four years, Subdivision Plan production has followed a reversed trend, down in each of the past three years.

Additional information may be obtained by contacting the Land Court Department Administrative Office.

LAND COURT DEPARTMENT
Five Year Trend in Case Flow

LAND COURT DEPARTMENT

Five Year Trend In Case Flow Entries

Fiscal Year '77

Fiscal Year '81

THE PROBATE AND FAMILY COURT DEPARTMENT

There are four general indicators of the workload in the Probate and Family Court Department for Fiscal Year '81. These four include original entries, dispositions, IV-D or Support Collections and fees collected.

Original entries, a count of all petitions, accounts and complaints filed in the Probate and Family Court Department during the fiscal year, reached a total volume of 128,695 in FY '81. This volume of entries, 11% over FY '80 and 26% above the FY '77 level, represents the largest single year change in the past five fiscal years.

Original entries are broken down into 15 detailed casetype categories. Increases were recorded in five categories, decreases in the remaining ten. For seven categories, these changes reflect minor fluctuations. For eight categories, the changes are notable because of either the magnitude of the change or evidence of a multi-year trend.

Seven of these 15 casetype categories are included under the sub heading of Probate Matters. As a sub group, probate entries, in total, have changed little in five years, dropping only 1% from the FY '80 volume and increasing less than 1% over the FY '77 level.

However, probate matters have decreased in relative proportions to total entries, down from 54% of the FY '77 total to 43% in FY '81.

In addition, four of seven probate categories have shown significant change in FY '81. Three of these, administrations, trusteeships and partitions, decreased from FY '80 case entry levels. For administrations and trusteeships, this decline is the continuation of a trend maintained in each of the past five fiscal years. Partitions, with minor fluctuations, have decreased by 32% from FY '77. The fourth probate category exhibiting notable changes is guardianships. Guardianships have increased 12% over FY '80 and 23% over the level of five years ago.

Changes of significance outside the Probate area include: the steady increases in each of the past five years in the number of custody of minor complaints entered; a one year, 50% increase in abuse prevention petitions filed; a steady rise in the number of entries recorded - 57% over FY '80 and 200% over FY'77 - in the miscellaneous or "all other" category; and, finally, a decrease of 27% from the FY '80 Separate Support and Maintenance entries volume which brought the number of entries to less than half the FY '77 level.

Seven divisions reported increased case entry volumes, while seven reported decreases. With two exceptions, a 31% increase in Middlesex and a 48% increase in Suffolk, these case entry fluctuations were generally minor.

Dispositions, a second indicator of general court activity, totalled 147,920 in Fiscal Year '81, down 3% from the comparable total for FY '80. Twenty-three percent involved the disposition of contested matters and 77% involved uncontested matters, a ratio roughly consistent with past years.

In general, the disposition rate for contested matters was down 13% from FY '80, while dispositions for uncontested matters were down only .1%. The most significant decreases in disposition categories were reported for Separate Support and Maintenance cases, in general, and in the number of contested motions disposed of. Relatively large increases in dispositions were reported for uncontested divorces, and modifications and for contested adoptions and probate matters, a category which almost doubled in one year.

The final two indicators of court activity are IV-D or Support Collections and Fees for certificates and copies. Both were up significantly in FY '81.

Fee amounts charged nearly doubled throughout the Trial Court in FY '81. This factor alone caused a significant increase in the amount of fees collected. Probate related fees increased 120%, divorce related fees increased by 45% and certificates and copies increased by 5%. In total, fees collected were 67% above the FY '80 level or \$1,673,604.01.

IV-D or Support Collections conducted by the Family Service Offices were also up in FY '81. In total, this year's level equalled \$85,594,302.00, up 25% over last year and up 844% over 6 years ago. Seventy percent of this money went directly to litigants. This portion is up 22% from FY'80. Similarly, the Department of Public Welfare, the agency to which the remaining 30% of total is directed,

received 33% more from Probate and Family Court Department collections this year than last year.

Additional information is available on the charts and graphs which follow and from the Administrative Office of the Probate and Family Court Department.

THE SUPERIOR COURT DEPARTMENT

Criminal Caseload

The Superior Court Department began Fiscal Year '81 with 16,544 criminal case entries pending, a level 7,185 entries or 30% below the start pending level of Fiscal Year '80.

During the Fiscal Year, 21,685 new criminal entries were commenced in the Department, down only slightly, 5%, from the FY '80 entry volume. Eighty-nine percent of these entries were commenced by grand jury indictment, 4% by complaint and 7% through the reactivation of a previously dormant criminal case.

Total caseload, entries pending plus new entries commenced, equalled 38,229 entries, down 18% from the FY '80 total caseload.

Dispositions of criminal entries were also recorded as 21% below last year's level, down from 30,203 in FY '80 to 23,902 dispositions recorded for FY '81. Dispositions in FY '81 break down into 48% by guilty plea, 11% by trial and 41% by other manner of disposition.

The ratio of criminal entries disposed of to entries commenced in FY '81 was 110%, and

the Department disposed of 63% of the 38,229 total caseload. These two ratios indicate a high degree of efficiency in meeting the demands of the criminal caseload.

As a result of this efficiency, the level of entries pending at the close of the Fiscal Year, 14,335 in total, was 13% less than the start pending level for the year.

Nine divisions reduced their pending criminal caseload during the Fiscal Year. Of the five divisional increases reported, all were less than 100 entries.

In summary, it appears that the number of criminal entries commenced per year in the Superior Court Department is beginning to stabilize. While dispositions have decreased, they are still outpacing new entries as the Department moves to comply with the ever tightening arrest-to-trial timetable of Rule 36 of the Massachusetts Rules of Criminal Procedure, the so called "Speedy Trial" rule. One indicator of the success of the Superior Court Department has had in complying with this timetable is the 19,268 entry or 57% reduction in "backlogged" cases since July, 1978.

Civil Caseload

On July 1, 1980 there were 82,228 civil cases awaiting action in the Superior Court Department. During the next twelve months, additional civil cases were commenced at an average rate of 2,423 per month for a fiscal year total of 29,072 new cases; this is 9% below the FY '80 civil case entry volume.

Total workload for the Department in FY '81, pending cases plus cases commenced, reached 111,300 civil cases.

The Superior Court Department disposed of cases at an average rate of 3,207 per month for a total of 38,480 dispositions for the Fiscal Year. This is an 8,068 disposition or 27% increase over last year.

The ratio of civil dispositions to entries for FY '81 was 132%. Eleven divisions reported a reduction of their pending caseload during the Fiscal Year, while the three divisional increases were, as with the increases in the pending criminal caseload, minor.

THE OFFICE OF THE COMMISSIONER OF PROBATION

INTRODUCTION

The Office of the Commissioner of Probation, an agency of the Trial Court, has a number of statutory responsibilities enumerated in General Laws, Chapter 276, Sections 99, 100 and 100A. These include supervision of the probation service, the forms to be used and procedures to be carried out in the various probation offices and the standards and rules of probation work. The Commissioner qualifies or disqualifies persons as eligible for appointment as probation officers and for promotion to various probation supervisory positions. He receives notices of intended disciplinary action against a probation officer or supervisory probation officer and investigates and files a written report and recommendation concerning same. He develops and conducts basic orientation and in-service training programs for probation officers and conducts conferences on probation. He operates the Probation Central File, which gathers and disseminates, to authorized agencies, the court offender record information on all defendants appearing in Massachusetts' courts since 1924 on either criminal or delinquency complaints. In addition, this Office coordinates all matters between Massachusetts and the other states

under pertinent interstate compacts involving adult or juvenile probationers.

LEGISLATION/COURT DECISIONS

Legislation of interest to the Massachusetts Probation Service in 1981 included:

Chapter 434 of the Acts of 1980

An Act Requiring Certain Persons to Report Cases of Child Abuse or Neglect - Medical and Dental Personnel, Public and Private School Teachers, Educational Administrators and Counselors, Police and Probation Officers, who in their professional capacity have reason to believe that a child is being abused or neglected shall report the same to the Department of Public Welfare.

Chapter 436 of the Acts of 1980

An Act increasing the penalties for the Manufacturing, Distribution and dispensing of Class A and Class B Controlled Substances and to limit Parole Eligibility for Certain Drug Related Violators.

Chapter 91 of the Acts of 1981

An Act relative to Regulation of Confidential Communication of Social Workers in Child Custody Proceedings.

Chapter 92 of the Acts of 1981

An Act Relative to the Appeal from an Adjudication of Paternity - Provides for the Right of an Alleged Father in a Paternity Suit to Appeal a Lower Court Adjudication, to a Jury of Six in the District Court in the County where the prior proceedings were held.

Chapter 237 of the Acts of 1981

An Act Further Regulating the Employment of Minors - Allowing said minor (age 14 and over) to Operate or to Assist in the Operation of Small Power Equipment of the kind used by Home Gardeners.

Chapter 282 of the Acts of 1981

An Act Relative to the Parole Board Consideration of Hearing Officers. Recommendation for Purposes of Granting or Revoking Parole.

COURT DECISIONS

Listed below are a number of Court Decisions noted during the calendar year 1981 which are considered to have an impact on the Probation Service:

Petition of the Department of Public Welfare to Dispense with Consent to Adoption - Mass. Advance Sheets, (Supreme Judicial Court, 1981, p. 931

Even though the child was born while the mother was incarcerated at MCI Framingham and the Department of Public Welfare "accepted" the child into its custody, we conclude that it was error for the Probate judge to have granted the Department's petition to dispense with parental consent to adoption where the judge made no express finding as to the current "fitness" of the child's natural parent.

Mahoney v. Gallagher - Mass. Advance Sheets, (Appeals Court), 1981, p. 1027

Where the Probate judge made comprehensive findings of fact and conclusions of law in an eleven page report which concluded that the establishment of a relationship between the father and his illegitimate child was in the child's best interest, we will affirm that judgment and deny the mother's appeal.

Miller, Larcombe and Santiago v. First Justice, Trial Court of Massachusetts, District Court Department, Holyoke Division
Single Justice Opinion, Supreme Judicial Court for Suffolk County - No. 80-179 - Civil - March 9, 1981

Three plaintiffs separately arraigned on criminal charges of non-support of their respective illegitimate child(ren). Two were subjected to temporary support orders and to contempt proceedings for failure to comply. None had been tried and there had been no adjudication of paternity or conviction of non-support.

Held. The temporary support and contempt orders are vacated. A temporary support order may be entered against the defendant in a proceeding under G.L.c. 273, sections 15, 16 only "after conviction".

Guardianship of Minor - Mass. Advance Sheets, (Appeals Court) 1981, p. 674

Unless a child's father files written consent to the proposed guardianship, the record must make clear that the father has been given proper notice. Further, there must be a finding of his unfitness. Because these findings were not made in the instant case, further proceedings were necessary.

Commonwealth v. a Juvenile - Mass. Advance Sheets, (Supreme Judicial Court), 1981, p. 1958)

Court held that in a juvenile proceeding in which there would be an indictment, had said juvenile been an adult, the (defendant) juvenile is entitled to have his case heard by a jury of twelve (12) as opposed to a jury of six (6).

Commonwealth v. Cardile - Mass. Advance Sheets, (Appeals Court) 1981, p. 1099

Defendant was found guilty of non-support in a jury of six session in the Boston Municipal Court on a complaint originating in the Dorchester District Court. The support order was entered after his conviction, and the defendant was placed on probation. Subsequently, the Support order was increased by a judge of the Dorchester District Court. The only claim made by the defendant in this

appeal is that a judge of the Dorchester District Court lacks jurisdiction to modify a support order entered by the Boston Municipal Court judge. We hold that he has such jurisdiction.

Commonwealth v. a Juvenile - Mass. Advance Sheets, (Appeals Court), 1980, p. 1565

Held, in a transfer hearing, a juvenile may be treated as an adult whether the offense was a misdemeanor or a felony, so long as the following applies:

(A) the offense involves the infliction or threat of serious bodily harm;

(B) that there is clear and convincing evidence the child involved presents a significant, continuing danger to the public and is not amenable to rehabilitation.

Longvall v. Meachum, et al - Mass. Lawyers Weekly, (U.S. Court of Appeals) June 29, 1981, p. 1081

Whereas a judge in the lower court threatens the defendant with a harsh sentence for refusing to plead guilty, this court held that the remarks "could endure a reasonable apprehension of vindictiveness" and was therefore a violation of the suspect's constitutional right to due process. The case was therefore remanded for resentencing.

Commonwealth v. Vickey - Mass. Lawyers Weekly, (Supreme Judicial Court), November 24, 1980, p. 9

Even though the defendant-petitioner received a full gubernatorial pardon (in 1978) from the false bomb report charge to which he had pleaded guilty (in 1972), the Commissioner of Probation was correct in refusing to allow his criminal record to be "sealed".

Bezio v. Patenuade - Mass. Advance Sheets, (Supreme Judicial Court), 1980, p. 2133

Court held that in a Probate Court proceeding, where the issue of whether the mother (a lesbian) was currently fit to further the welfare of her children, the "best interest of the child test" and the "unfitness of the parent test" reflect different degrees of emphasis and are not separate and distinct, but cognate and connected.

Labor Relations

During calendar year 1981, the Office of the Commissioner of Probation provided ongoing day-to-day advice and counsel to field probation management personnel relating to a variety of labor relations matters (viz - maternity leave, vacation accrual, sick leave, compensatory time, etc.)

The Office of the Commissioner of Probation conducted six (6) "internal affairs" disciplinary investigations; held sixteen (16) "Step 2" grievance hearings; participated in nine (9) arbitration actions; assisted in the preparation of six (6) civil actions to which the Office of the Commissioner of Probation was a party; and participated in the negotiation of two (2) labor Agreements between the Chief Administrative Justice of the Trial Court and (a) the Office and Professional Employees International Union, Local 6, AFL-CIO, and (b) the Service Employees International Union, Local 254, AFL-CIO.

COMMISSIONER'S OFFICE

Probation Central File

A revised abbreviation and code book was distributed in January of 1981. It is titled the "Probation Central File (PCF) Instruction Manual", to be used for Massachusetts Probation Office reporting and requesting court offender record information.

Microfilming

Microfilming of certain sections of the Probation Central File was begun during 1979 and continued throughout 1981. At the close of the calendar year 1981, approximately 938,265 court offender records were placed on microfilm, bringing the total records microfilmed to 1,819,265.

The records selected for microfilming are:

- * deceased persons records (approximately 24,000)

- * sealed records (approximately 34,422)

* records of persons with dates of birth prior to January 1, 1915, approximately 1,610,921.

The physical space constrictions imposed on the Probation Central File working area, and the fact that the manual file, even with computerization, will be active for at least the next several years, suggest that the microfilming activity is a necessary part of the total Probation File operation.

Sealed Records

Sealing of records continues at a steadily increasing rate. During calendar year 1981, approximately 16,702 court offender records were sealed. A total of 98,529 records are now in the sealed record file.

Conversion of PCF

The test phase of the conversion of the Probation Central Manual File (PCF) to the automated file will commence on January 4, 1982. At present, there are three remote terminals located in the Probation Central File linked up to the Trial Court data processing computer in Cambridge.

During the initial test phase, 17 and 18 year old offenders coming into PCF daily, via the CP-1 form, will be entered into the automated system by a team consisting of data entry supervisors, data entry operators and quality control personnel. The test phase of the automated system will deal mainly with quality assurance and with definitions for the procedures involved in assembling the total record information and entering this information into the computer. The final phase of full implementation of the system is scheduled to begin on July 1, 1982. At that time, 10 terminals will be in use for entering all incoming daily CP-1 information.

The conversion process will require the maintenance of a dual file system for a significant period of time (about 3 years), due to the size of the existing manual file, the nature of the material contained therein, and the security and privacy precautions being built into the automated system.

The automated PCF system will meet two primary needs: the need to automate the storage and retrieval of court appearance records by offender; and the need to facilitate data availability for statistical analysis.

The objectives of the automated criminal information system are improvements in four major areas of operations:

1. expeditious handling of inquiries concerning offender records;
2. accurate updating of criminal records from court proceedings;
3. increased number of research reports on a variety of topics because statistics for these reports, now gathered manually, would be prepared automatically;
4. increased productivity and improved cost effectiveness should result from the elimination of the manual system.

Fees for Record Searches

The Office of the Commissioner of Probation collected \$3,579.00 in fees for calendar year ending 1981 in accordance with Massachusetts General Laws, Chapter 276, Section 100 which reads in part as follows: "... Commissioner of Probation shall collect information ... The information so obtained and recorded shall not be regarded as public records and shall not be open for public inspection but shall be accessible to the justices and probation officers of the courts, to the police commissioner for the city of Boston, to all chiefs of police and city marshals, and to such departments of the state and local governments as the commissioner may determine. Upon payment of a fee of three dollars for each search, such records shall be accessible to such departments of the federal government and to such educational and charitable corporations and institutions as the commissioner may determine".

Management Information System

The Office of the Commissioner of Probation implemented a new Management Information System January 1, 1981, and through data from the Monthly Reports, Commissioner

Joseph P. Foley, Chief Administrative Justice Arthur M. Mason, Department Chief Justices, local judges and chief probation officers are now able to assess month-by-month shifts in local probation activities. Under the new computerized system, local probation offices transmit standard Monthly Reports to the OCP Research and Statistical Bureau by the 15th of each month, and by the end of the month, the chief probation officers receive a printout with data covering the previous months. After a year, a revolving 12-month data base will be included in the printouts.

In addition to providing information on individual court activity, the new feedback reports include data on statewide averages and facilities estimated projections which will help in long-range planning. Specialized information reports are also produced each month with year-to-date data on support collections, arraignments, juvenile transfer hearings and bindovers, among other variables.

The next component to be computerized will be the Probationer Risk/Need Classification System. Classification forms submitted to OCP will be coded and data entered in the Trial Court Data Processing Center Computer, via the CRT terminal in the Research and Statistical Bureau. Implementation of this component of the MIS System is expected during the latter part of 1982.

Research

Under Chapter 276, Section 98, the Commissioner of Probation is mandated to "compile, evaluate and make available for official use and public education . . . statistical information on delinquency, crime and appropriate family matters . . ."

Data is drawn from various sources, including the Monthly Report of Probation Activity submitted by each probation office, which is incorporated into the Management Information System. Implementation of computerization of the Monthly Reports of Probation Activity began in 1981.

Data from individual court appearance records

is also analyzed, to produce research reports on special criminal justice topics.

In 1981, the Research and Statistical Bureau published the following research reports:

- * Driving Under the Influence of Liquor: Dispositions and Placements in Drivers Alcohol Education Programs;
- * Drug Defendants in Massachusetts: 1978-1980;
- * Juvenile Defendants in Massachusetts: Crimes Against Persons;
- * Patterns of Crime and Delinquency in Massachusetts: 1978-1980;
- * Population of Counties in Massachusetts by Age Categories: 1950-1980

In addition, the Research staff also assisted numerous outside certified agencies with research projects which, in order to be accomplished, required access to criminal history records from the Probation Central File.

A total of 6,540 court appearance records from the Probation Central File were analyzed for in-house and outside agency research purposes in 1981.

In 1981, the Research and Statistical Bureau received 564 requests for copies of various research reports published by the Office of the Commissioner of Probation. These studies were mailed all accross the United States and Canada, as well as to Europe. These reports have been requested by State Legislatures, members of the United States Congress, Drug/Alcohol Abuse Commissions, University Libraries, Law Libraries, Public Libraries and Resource Information Centers. The studies have been used by professors and students at colleges and universities, probation officers, judges and the media, in addition to being reprinted in professional journals.

Regional Probation Administration

During 1981, the Regional Probation Administration staff of the Office of the Commissioner of Probation carried out the following duties assigned by Commissioner

Joseph P. Foley:

- * through technical assistance and consultation services, assisted local probation offices in implementing and utilizing professional probation standards as promulgated by the Commissioner of Probation with the approval of the Chief Administrative Justice of the Trial Court;
- * monitored and assessed the use of such standards and the related forms and procedures in local probation offices;
- * conducted regular site visits to all probation offices to facilitate the dissemination and implementation of probation policies and procedures;
- * assessed local office management, operational needs and identified probation service training concerns;
- * conducted regularly scheduled regional meetings with local probation office managers;
- * participated as instructors in various probation officer workshops and training programs that involved orientation, standards, child support enforcement and supervisory skills.

Specifically, during 1981, the Regional Probation Administration staff closely monitored local implementation of Probation Investigation Standards (adult and juvenile), the "Risk/Need" Probationer Classification System, the Monthly Reporting of Probation Activities Standard and provided local probation office managers with an appraisal of such local implementation. Local offices also received technical assistance from Regional Probation Administrators to help improve the quality of implementation of these probation standards and systems.

Upon completion of such monitoring, the Regional Probation Administrators made recommendations to Commissioner Foley and to other OCP Divisions regarding modification of standards, systems and forms.

The Regional Probation Administrators also worked closely with the chief probation officers concerning labor relation policy, procedures and issues, and provided technical

assistance where local problems arose.

The OCP Administrators conducted 30 regional chief probation officer meetings during the year, in which they discussed policy items established by the Commissioner as well as soliciting for the Commissioner, the concerns and suggestions of local probation management.

Finally, the Regional Probation Administration supported and assisted the other Divisions of the Office of the Commissioner of Probation in working toward the achievement of Commissioner Foley's mission and goals for the Massachusetts Probation Service.

Accreditation

1981 was a very active year for the Massachusetts Probation Accreditation Commission (MPAC); there have been personnel changes, increased participation and interest from probation departments, independent site teams training, site team visits for compliance verification of standards probation offices awarded full accreditation.

Upon Christine Sonnhalter's leave in March, Gerald C. Murray, on leave as Assistant Chief Probation Officer at Norfolk Probate Court, took over the duties and responsibilities of the Executive Secretary of MPAC. Five (5) new applications for probation officer accreditation were received and accepted during the year, bringing the total number of probation offices involved to twenty (20). The five (5) new office applicants are: Fitchburg Division and Northern Worcester Juvenile Division of the District Court Department; Essex Division of the Probate and Family Court Department; and Bristol and Berkshire Divisions of the Superior Court Department.

Eleven (11) site team participants completed an extensive training workshop geared to probate court probation office responsibilities, conducted by MPAC and OCP staff, to familiarize them with the Massachusetts Probation Service, the established standards for accreditation, and the verification techniques. During the year, there were three-

day site team visits to the Bristol, Norfolk and Worcester Divisions of the Probate and Family Court Department.

As a result of the MPAC's certification for accreditation, the Commissioner of Probation presented five-year certificates of accreditation to the probation offices of: the Wareham Division of the District Court Department on February 13, 1981; the Gardner Division of the District Court Department on March 9; the Bristol Division of the Probate and Family Court Department on November 2; the Norfolk Division of the Probate and Family Court Department on November 23; and the Worcester Division of the Probate and Family Court Department on November 30.

The Accreditation Standards Committee has become very active in the additional revision of the present accreditation standards, and they are making excellent progress in updating these standards in order to include and attempt to exceed the standards promulgated by the Office of the Commissioner of Probation to be followed in all probation offices.

Standards

In 1981, there was considerable activity in the development, promulgation and monitoring of "standards and rules" in several areas of probation work, as mandated in the court reorganization legislation of 1978.

The Standards for Reporting Monthly Probation Activities by all probation offices in the Trial Court took effect January 2, 1981, following one month of training in its implementation. All probation offices in the Commonwealth have complied in submitting the monthly statistics required by this Standard. The statistics have been audited by the Regional Probation Administrators to assess the accuracy of the data and there will be further monitoring in 1982. Feedback reports of the statistics have been sent monthly to each court for use by probation office managers in evaluating their office systems.

Also in January, 1981, the Standards for

Probation Investigation in the Juvenile Court were promulgated, incorporating the recommendations of an advisory committee of probation officers working with juveniles. Following training sessions, this Standard was implemented on March 1, 1981. All Juvenile Court and Juvenile Divisions in the District Court Department have been monitored and findings indicate a substantial degree of compliance with this Standard for Investigation.

In May, 1981, the "Juries of Six" case procedures for probation offices and forms and the Surrender and Revocation of Probation procedures and forms were formally promulgated by Commissioner Foley. A modified Standard for Intra-State Transfer of Probation Supervision also was established and promulgated that month.

The Standard for Risk/Need Classification of Probationers, to be used in the Superior, District, Boston Municipal and Juvenile Court Departments was promulgated on December 14, 1981. This Standard is an outgrowth of the Risk/Need Guidelines, Reports I and II. The experiences and lessons of the first two phases of the Classification system were evaluated; the extensive constructive feedback was considered and these lead to the establishment of the present Standard for Risk/Need Classification of Probationers.

A probation officer task force was selected early in 1981 to draft supervision standards in the Superior, District, BMC and Juvenile Court Departments. Upon completion of their work, Commissioner Foley incorporated their recommendation in the Standard for Supervision, also promulgated December 14, 1981 with the approval of the Chief Administrative Justice.

An intensive 4-week program has been designed to train 800 probation officers in both the Risk/Need Classification and Supervision Standards. Training will take place in February and March of 1982, and both of these Standards will go into effect April 1, 1982.

A draft of standards governing probation office procedures and record keeping was developed by a representative group of probation office personnel and OCP staff in 1981 and their recommendations have been received by Commissioner Foley. This Standard will be refined and promulgated in late 1982.

Risk/Need Classification

During the past year, the Office of the Commissioner of Probation has been working diligently on further development of a Probationer Risk/Need Classification System. Special recognition and appreciation are given to the staffs of the probation offices of Hampden, Plymouth and Suffolk Superior Courts, Cambridge, Peabody, Quincy, Taunton, Worcester District Courts, and the Middlesex Juvenile Probation District Office. The probation staff of these courts worked in close conjunction with the Research and Statistical Bureau of the Office of the Commissioner of Probation, under a grant funded by the National Institute of Corrections, in developing one of the few research validated probationer classification systems in the United States. Additional work was done by the OCP Regional Administrators in monitoring the work of the other 81 probation offices of the Commonwealth that handle criminal or delinquent probationers. As a result of the total team effort put forth by the probation field and the Office of the Commissioner of Probation, Massachusetts will be one of the few states having a validated Probationer Classification System and a system-wide set of standards relating to probationer classification. The standards which have been approved by the Chief Administrative Justice of the Trial Court have been promulgated by the Commissioner of Probation and become effective April 1, 1982.

Training

The Office of the Commissioner of Probation provides orientation training (General Laws, Chapter 276, Sections 85 and 99) for all newly appointed probation officers. This intensive one week training program consists of

instructions in basic areas such as investigations, classification, supervision and use of community resources.

Additionally, probation officers are required to participate in continuing in-service training programs. This requirement may be satisfied in several ways: completing training programs conducted by the OCP; completion of college/university courses approved by the Commissioner; and completion of local training programs also approved by the Commissioner.

In 1981, the Staff Development Division conducted 6,636 person hours of training programs with 498 probation office personnel attending the courses. These training programs included:

- * Probation Standards
- * Orientation for new probation officers
- * Management
- * Supervisory Skills
- * IV-D Workshops concerning support collections
- * Burnout and Stress

SPECIAL PROBATION POPULATIONS

Interstate Compact for Adults

The interstate movement of adult probationers is handled under the Adult Interstate Probation and Parole Compact; the Commissioner of Probation is Deputy Administrator for Massachusetts in adult probation matters.

In 1981, Massachusetts probation offices supervised 1,188 adult probationers from other states, while 836 Massachusetts probationers were transferred for supervision by probation officers in other states where the probationers would be residing.

Massachusetts probation officers through OCP, at the request of Compact Administrators of other states, also conducted 407 presentence investigations of Massachusetts residents who were arraigned and tried in criminal courts of other states.

Interstate Compact for Juveniles

The Commissioner of Probation is the Massachusetts Administrator of the Interstate Compact for Juveniles, which provides:

- * cooperative supervision of delinquent juveniles between subscribing states;
- * return from one state to another of delinquent juveniles who have escaped or absconded from the Department of Youth Services (DYS);
- * return from one state to another of non-delinquent juveniles who have run away from home.

In 1981, 206 juveniles on probation in other states, but now residing in Massachusetts, were transferred into and supervised by Massachusetts probation offices, while 153 Massachusetts juvenile probationers now residing elsewhere were transferred to other states for probation supervision.

In 1981, 116 juveniles who had escaped or absconded from DYS were returned to Massachusetts from other states, while 31 were returned to other states from Massachusetts. In 1981, 48 juvenile runaways were returned to Massachusetts from other states, while 28 were returned to other states from Massachusetts.

Children in Need of Services

The Boston, Worcester, Springfield and Bristol County Divisions of the Juvenile Court Department, and the juvenile sessions of a number of Divisions of the District Court Department, have jurisdiction over Children in Need of Services cases, which include stubborn and runaway children under 17 years of age, and truants and school offenders 6 to 16 years of age.

In 1981, 4,005 applications for CHINS petitions were considered and 2,168 petitions were allowed. Among the CHINS applications, 29% were for runaway children, 38% concerned stubborn children; 31% were for truancy, and 2% were for school offenders. Among the CHINS petitions allowed in 1981, 43% were for

runaways, 31% were for stubborn children, 24% were for truants and 2% were for school offenders.

Care and Protection

In 1981, 1,355 children made initial court appearances on care and protection petitions. These new care and protection petitions were brought before the courts, on behalf of children under 18 years of age who were allegedly being abused and/or neglected. This compares to 2,097 care and protection petitions in 1980.

Among the new care and protection cases in 1981, 644 were boys (47.5%) while 711 were girls (52.5%).

Delinquency Complaints

According to data submitted on the Monthly Reports of Probation Activities, 22,129 juveniles were charged on delinquency complaints statewide in 1981. Males accounted for 18,832 (86%) of the delinquency complaints, while females accounted for 3,297 (15%).

Commitments to the Department of Youth Services

A juvenile or district court division may decide that a delinquent child needs rehabilitation treatment outside the home community. Upon adjudication such a child may be committed for minority to the Department of Youth Services for evaluation and rehabilitation.

During 1981, 1,493 children were committed to DYS for their minority (unless sooner discharged by DYS) for services. Males accounted for 91% of the DYS commitments in 1981, while females accounted for 9%.

These statistics do not include a large number of arrested or children temporarily committed for custodial purposes, who were charged with delinquency.

Juvenile Bindovers

Some juveniles, ages 14-16, commit crimes of such a serious nature that a juvenile or district court division may decide that they should be tried as adult criminals, with concomitant adult penalties if found guilty. The procedures for a transfer hearing are outlined in Massachusetts General Laws, Chapter 119, Section 61.

In 1981, 36 juveniles were so transferred on criminal charges. This compares to 43 juvenile bindovers in 1980, 47 in 1979, 42 in 1978 and 36 in 1977.

CONCLUSION

The Commissioner appreciates the cooperation and support received from the Chief Administrative Justice, the Trial Court Administrator, the Justices of the Trial Court and the probation officers and their support personnel in the 100 probation offices of the Massachusetts Probation Service.

The Governor's Office, the Legislature and the City of Boston have been of significant help to us.

The Commissioner is particularly grateful for the professional manner in which the entire staff at 211 New Court House has approached the challenges of the past year.

Data on the following statistical charts were compiled from the Monthly Reports of Probation Activities, as submitted to the Research and Statistical Bureau, Office of the Commissioner of Probation, from the local probation offices.

Inasmuch as this data is based on various probation indicators as they are reported to the Office of the Commissioner of Probation through the new Management Information System, (a system which is still in the developmental stages), it should be considered as providing general indicators of probation activity in the various offices. Because of the extensive monitoring of this data, as well as methodology changes from prior years, in no way should the 1981 statistics be compared to data reported prior to 1981.

COST PER OFFENDER : \$305.83 (BASED ON 88,665 ADULT AND JUVENILE OFFENDERS UNDER RISK/NEED AND ADMINISTRATIVE SUPERVISION IN SUPERIOR, DISTRICT, BOSTON MUNICIPAL AND JUVENILE COURT DEPARTMENTS AS OF JUNE 30, 1981).

NOTE: Probate and Family Court Probation Services annual costs for Fiscal Year 1981 (\$2,353,610.85) are not included in the total, inasmuch as the Cost per Offender is based on criminal and delinquency activities in the Superior, District, Boston Municipal and Juvenile Court Departments.

THE OFFICE OF THE JURY COMMISSIONER FOR MIDDLESEX COUNTY

During 1981, the major goal of the Office of Jury Commissioner was to obtain legislative authority to expand the Middlesex County jury system to other counties. The expansion bill was passed in the Massachusetts Senate, but it was not passed in the House of Representatives. This constituted a major disappointment for the staff of this office who were eager to address the challenges of implementing the system in a new county.

Although some opposition has been expressed, there is a remarkable movement in favor of the expansion of the Middlesex jury system. H.5694 is the principal expansion bill for the 1982 legislative session. This bill has been approved by the Jury Management Advisory Committee and the Judicial Conference.

The Chief Justice of the Supreme Judicial Court and the Chief Administrative Justice jointly have identified the expansion of the Middlesex jury system as one of the four most critical priorities of the Massachusetts courts. There are twenty-five legislative sponsors from the House and Senate representing eight of the more populous counties. The Governor supports expansion. The City Clerks' Association, the Town Clerks' Association, the Selectman's Association, the Election

Commissioners' Association, and the Massachusetts Municipal Association are working together to foster grass roots support for expansion.

It is expected that most cities and towns of the Commonwealth will pass a resolution in support of statewide expansion. There is good coverage and strong support by the news media. The Massachusetts Bar Association has made expansion one of its top priorities, and it is supporting the bill actively. Likewise, the bill has been endorsed as one of the top priorities of the League of Women Voters. Perhaps the strongest support for expansion comes from the ever-growing numbers of citizens of Middlesex County who have experienced the system firsthand as jurors and who are persuaded that the system is worthy of being shared by all citizens of the Commonwealth.

H. 5694 authorizes statewide expansion by means of a phased implementation under the control of the Supreme Judicial Court. The automated portions of the system would be performed in Cambridge for the entire Commonwealth. All of the jurors' telephone inquiries and scheduling would be handled in Cambridge via toll-free lines. The Supreme

Judicial Court would, by rule of court, establish the new jury system in a county (or group of counties) as soon as such county was ready for implementation; this process would continue until the new system was operational in all counties. In determining when a county was "ready," the court would consider factors such as: court caseloads, training of personnel, adequacy of facilities and equipment needs, preparedness of the cities and towns, the readiness of the Office of Jury Commissioner, budgetary considerations, etc. In this way, the system would be implemented and expanded with minimum hardship. Through the budgetary process, the Supreme Judicial Court and the Legislature would be cooperating to insure the maximum success of this comprehensive improvement in the jury system of the Commonwealth.

In Commonwealth vs. Bastarache, 80 Mass. A.S. 2465; 414 N.E. 2d 984 (1980), the Supreme Judicial Court underscored the need for improving juror-selection procedures throughout the Commonwealth. The court made an extraordinary request of the Attorney General of the Commonwealth, with the assistance of others of his choosing, to prescribe procedures for the compilation of jury lists for cities and towns not using substantially random methods of selection.

Attorney General Bellotti formed an advisory committee comprised of representatives of the court system, the law enforcement community, the defense bar, the cities and towns, and the office of the Attorney General. The Jury Commissioner for Middlesex County and the Data Processing Manager of the office participated in the work of the advisory committee.

In June of 1981, the Attorney General published suggested guidelines for the compilation of representative jury lists. These guidelines were distributed to each city and town outside Middlesex County. During the summer, the Attorney General and members of the advisory committee conducted educational seminars in various regions of the state. Representatives from all cities and towns (except those in Middlesex County) were invited to attend

these seminars. The response from the cities and towns was excellent in their attendance, interest, and desire to improve the jury system.

In a nutshell, the guidelines urged the cities and towns to adopt objective and random methods of selecting citizens for juror lists. Regarding statutory class exemptions, the guidelines recommend that these exemptions are elective and not mandatory; such election should be made by the individual to whom the exemption applies and not by the municipality. Regarding discretionary decisions of good character and hardship, the guidelines recommend that these decisions should be made at the judicial level and not at the local level.

Also contained in the guidelines is a provision whereby any city or town may request assistance without charge from the Office of Jury Commissioner in making random selections of prospective jurors. A special computer program, entitled Program Bastarache, was written in this office. The office of the Chief Administrative Justice authorized the use of its computer resources for this purpose. Many cities and towns have requested this service simply by writing a letter to this office. Many more cities and towns are expected to use this service when compiling their 1982 juror lists.

When a request letter is received, the Bastarache program is executed on the computer generating a random selection for the particular city or town. The printout is mailed to the city or town usually within twenty-four hours after receipt of the letter. In this way, the office of the Jury Commissioner is participating, albeit voluntarily, in juror selection in many areas of the Commonwealth outside Middlesex County.

Chapter 518 of the Acts of 1981 grants to the clerk-magistrate of the court the authority to excuse a person from juror service if at any time it appears that the public interest will be served thereby or if the performance of juror service will impose undue hardship or unusual inconvenience upon the person. This discretionary authority formerly was vested

only in the judge. While the Bastarache guidelines strive to "tighten up" the juror-selection system by eliminating excuses at the local level, this recent statutory amendment creates a new avenue for excuses. It is recommended that the Supreme Judicial Court by rule prescribe adjudicatory procedures governing the excusing of jurors by judges and clerks-magistrate that will be uniform throughout the Commonwealth.

This office was the recipient of a Law Enforcement Assistance Administration (LEAA) Demonstration Grant for the statewide improvement of the jury system. This grant was scheduled to terminate in October of 1981. Because expansion had not been authorized and for other administrative reasons, an extension of the grant until June 30, 1982, was requested. The extension was granted. There is no possibility of a further extension because LEAA has been abolished as a federal agency.

During the final period of the grant, two types of activities are occurring. The first type of activity is to implement immediate improvements in the jury systems of the Commonwealth.

Examples are: preparation of a statewide color orientation videotape for jurors; purchase and installation of videotape playback equipment; preparation of a statewide juror handbook; purchase and distribution of such handbooks; purchase and installation of juror standby (telephone call-in) systems in selected courts; etc.

The second type of activity under the grant is to defray capital-outlay expenses of expansion. To this end, computer programs are being modified to be able to service all counties. The central mail processing capability of the office is being enlarged to be able to service all counties. Likewise, telephone answering and sequencing equipment is being upgraded to handle additional volumes expected with expansion. On-line computer equipment is being purchased and installed in selected courts in preparation for expansion.

The Middlesex jury system began operations on

January 1, 1979. It was intended to be a pilot project that would demonstrate the feasibility for the entire Commonwealth of a modern system of juror selection and management. It has been in operation for more than three years.

Substantial improvements have been made since the system's implementation in five major areas: in the legal composition of juries, by improving the representativeness of cross-sections; in financing the jury system, by reducing costs; in administration, by incorporating technology and modern management; in the public's appreciation of the judicial branch, by making juror service less onerous and by providing the means by which large numbers of citizens participate in and experience the judicial system firsthand; and in fundamental fairness and democracy, by abolishing class exemptions and eliminating excuses for hardship except where a person is physically or mentally unable to perform juror service satisfactorily.

Of the five major areas mentioned, it is ironic that only the last area is a serious impediment in the path of expanding the system to other counties. It is earnestly hoped this impediment will be overcome in the forthcoming year.

The remainder of this report presents various data on demography, finances, and juror utilization and management. The data provide quantitative measures for evaluating the Middlesex jury system.

DEMOGRAPHIC ANALYSES

The summoning process under the Middlesex system is "purely" random. Prospective jurors are selected from the most inclusive population lists. However, every step in the selection and scheduling process is somewhat non-random. Older persons are excused from performing juror service because of medical disabilities more readily than younger persons. Older persons tend to postpone juror service to the spring and fall in order to avoid the extremes of weather. Teachers and students tend to postpone juror service to periods when

schools are not in session. In an era of the energy crisis, increasingly more individuals seek to perform juror service at the court location closest to their homes. These non-random aspects make the system flexible and accommodating to jurors' needs. They are an integral and essential part of the system. They contribute substantially to the public's satisfaction with the Middlesex system. Despite the dynamic non-random aspects of the Middlesex system, it is believed that the demographic cross-sections are the finest in the nation.

Figures I and II, entitled "MASTL-81" and "JURORS-81" respectively, contain analyses of the ages of the adult population of Middlesex County and the ages of those citizens who served as jurors during 1981. MASTL-81 is a random sample of the residents of Middlesex County who are eighteen years of age or older, hereafter called "adult residents." Because the sample size is so large, roughly one in ten, the statistical properties of the Master List are virtually identical to those of the county at large. It is assumed that the Master List is an exact representation of the county in the following. Thus, the mean adult age of a resident of Middlesex County is 43.7 years.

In Figure I, "population" refers to the total number of persons on the Master List (not the population of the county). In a small percentage of cases, no date-of-birth or year-of-birth has been provided. In Figure I, 4,699 persons do not have birth data. The "sample size" indicates the number of persons on the Master List for whom birth data is available. The same definitions of population and sample size apply to Figure II except this graph pertains to those persons who actually served as jurors during 1981. A person "serves" if he or she is present in the juror pool and available to be impanelled whether or not the person actually is impanelled. The mean age of jurors, i.e., those who have served, is 41.1 years. The significant downward shift in the mean age of jurors with respect to the mean age of adult residents reflects the fact that higher percentages of older citizens are excused from serving because of medical disability.

In Figures I and II, the first column, entitled "AGE," contains age brackets. Persons who are between 18 and 19 years old are contained in the 18.5 bracket, and so on. The second column contains a histogram of the percentages for each age bracket. The histogram should be viewed with the long side horizontal; age brackets should be read from left to right. The histogram represents a "cross-section" as well as a probability density function. The third column, entitled "FREQ," contains the actual numbers or counts of persons in the respective age brackets. The fourth column, entitled "PCT," contains the percentages that are plotted in the histogram. The fifth column, entitled "CUMUL," contains the accumulated percentages in increasing age brackets.

Comparison of the two histograms yields the quality of the age distributions. Even though the selection system is dynamic and flexible so that jurors' needs can be accommodated, the two histograms "fit" quite closely. If one compares these histograms, age-bracket by age-bracket, it is seen that the two graphs overlap closely except in the regions for senior citizens. Because the two histograms are normalized, i.e., the percentages sum to 100% in each case, underrepresentation of senior citizens as jurors will bias the jurors' histogram slightly higher in the region of younger jurors. While not perfect in the scientific sense, it is felt that the Middlesex age distribution is exemplary as a legal standard.

Figures III and IV, entitled "MASTL TOWNS - 81" and "JURORS' TOWNS - 81" respectively, contain analyses of the adult residents and jurors by city or town of residency during 1981. Comparison of the two histograms shows the quality of the geographical representation. Some larger cities and towns have lower percentages than expected. There may be several reasons: large older populations; more mobility of the population; larger numbers of college students with out-of-state residences; differing quality of population lists; less availability of private transportation; etc.

Figure V, entitled "SEX DISTRIBUTIONS-1981," shows the sex distributions of the adult

FIGURE VI: LENGTH OF TRIAL JUROR SERVICE - 81

NOTE: 82% of trial jurors complete juror service on the first day (often on the first morning).

94% of trial jurors complete juror service within three days.

residents and jurors during 1981. As explained above, sample size differs from population because there are some persons for whom no sex-identification data is available; however, this is negligible. The percentage of women jurors is lower than expected compared to the population at large (and, correspondingly, the percentage of male jurors is higher than expected). Women comprise a larger percentage of the older population. Consequently, women receive a higher percentage of excuses for medical disability. This explains the lower-than-expected percentage of women jurors. The result is consistent with data from previous years.

The most oft-quoted statistic, and certainly the one of most concern to jurors, is the probable length of the term of juror service. Figure VI, entitled "LENGTH OF TRIAL JUROR SERVICE-1981," contains the distribution for the numbers of days of service of trial jurors during 1981. Note, 82% of trial jurors completed juror service on the first day. Many of these jurors were discharged at lunch time so they had the second half of the day to conduct their normal affairs. 94% of trial jurors completed juror service within three days. Only 6% of trial jurors served longer than three days. This is why the Middlesex system is financially successful. As to those jurors who serve for three days or less, the Commonwealth obtains their services at minimal or no cost. The majority of the costs for these services are provided by employers or the jurors themselves. In the majority of cases, the Commonwealth is spared most of the cost of compensative jurors--which is the secret of the financial success of the Middlesex system. The shortness of the term of service also is the secret of the wide public satisfaction with the Middlesex system from the viewpoints of jurors and employers.

FINANCIAL ANALYSES

The most important feature of the Middlesex jury system is that it improves the quality of jury verdicts by producing juries that are much more representative of the community. This constitutional feature must be paramount. In an era of drastically reduced governmental

budgets, the Middlesex system offers a second feature, often called "frosting on the cake," namely that it saves money for the Commonwealth. At this point, it is beyond question that the Middlesex jury system realizes substantial savings compared with the traditional jury system. The exact amount of such savings is not available because of a lack of uniform definitions, non-availability of certain data, and changing circumstances in the courts which make comparisons difficult.

In order to understand the financial impact of the Middlesex jury system, three major areas must be considered: cities and towns, court resources, and the jury-system. It has been the experience of the cities and towns of Middlesex County that the new juror system has the net effect of relieving them of administrative duties and their associated costs.

Most Middlesex cities and towns have a single contact with the Office of Jury Commissioner each year at which time a list of the adult residents is submitted usually in automated format. No longer must the cities and towns of Middlesex County interview jurors in person or by mailed questionnaire in order to determine whether citizens are qualified to be jurors. No longer must the cities and towns select prospective jurors. These functions are performed centrally for the entire county. The bulk of the tedious paperwork, after the submission of the Local Resident List, is performed centrally in this office by computer. No longer need each city and town publish its juror list because this office sends two computer-prepared prospective juror lists to each city and town.

All of these services are performed at no cost to the cities and towns. This is why there is widespread support for expansion at the local level of government even outside Middlesex County. The dire financial constraints imposed by Proposition Two and One-half are being felt statewide. As mentioned above, this office upon request is assisting cities and towns throughout the Commonwealth in preparing randomized juror lists without cost.

The second area of savings is in the resources

of the courts and parties consumed in challenges to the constitutionality of the juror-selection process. Thusfar, there has not been a single challenge of the juror-selection process in Middlesex County. In the other counties administering the traditional juror-selection system, i.e., the "key-man system," the number of challenges is increasing. This was anticipated in the Bastarache case, cited above. Each challenge is a long and complex procedure requiring extensive investigation and data at the local level and consuming large amounts of time and resources in the trial court and frequently at the appellate level as well. Although not easily converted to "dollars," these constitutional challenges have an impact financially and in the public's confidence in the judicial system.

The third area of financial impact is in the jury system itself. This area divides into two parts: costs of juror compensation and costs of administration. Regarding juror compensation, experience has demonstrated that more than fifty percent savings for the Commonwealth are realized under the Middlesex system. Moreover, these savings can be increased even further if changes are made to the statutory plan for compensating grand jurors. These changes are pending in the Legislature as part of the expansion bill, but the changes have independent merit. These changes would eliminate double compensation, paid by employers and the Commonwealth, for grand juror service (sometimes called "double dipping"); also the first three days of grand juror service would be paid by employers rather than the Commonwealth as is the practice with trial jurors. It is recommended that the Legislature consider these amendments independently of expansion.

Regarding costs of administration, there are many half-truths and misstatements that have been bandied about. The Middlesex jury system admittedly is a relatively expensive system to administer. The Office of Jury Commissioner is a new and independent state agency. Its mandate is to make juror service as convenient and meaningful as possible. To that end, the office must be available to the public and responsive to its needs. Virtually all of the juror functions, whether they be

selection at local levels or scheduling and payment at the judicial level, are handled by computer. The staff necessarily must be mature and highly trained individuals. The staff has established a reputation of courtesy and competence with the public. As almost any private enterprise will confirm, this investment in good will pays generous dividends.

It is not accurate to say that the Middlesex jury system creates an additional layer of administration as if there were no administrative costs in the traditional jury system. The costs of administration in the traditional system are not consolidated in a single budget; they appear in clerks', court officers', and administrators' budgets often without specific reference to the jury system. To treat Middlesex administrative costs as entirely "new" is to overlook comparable but less obvious costs in other counties.

Nor is it accurate to extrapolate proportional administrative costs when considering expansion. When statewide expansion occurs, the system will evolve through three phases. The first is the development phase, now completed. The second phase will be expansion. The third phase will be maintenance. The characteristics of the staff will change in each phase. The staff during the development phase was engineering oriented. The staff during the expansion phase will be training oriented. During the maintenance phase, the staff will be strictly operations oriented. Generally speaking as the system evolves, the staff will be replaced and supplemented with new persons and positions that require less managerial and technical skills and lower salaries.

The overhead costs per juror will decrease as the population served is enlarged. For example, it does not require twice the programming staff to summon twice the number of jurors; it does require twice the postage to summon twice the number of jurors. It is estimated that overhead costs will increase about fifty percent as fast as the increase in population served. It is further estimated that the workload of the Office of Jury Commissioner would increase five-fold

if the system were expanded to the entire Commonwealth (fourteen counties).

One must distinguish between capital-outlay expenditures and ongoing administrative costs although this distinction is not always clear in budgets and appropriations. For Middlesex County, most of the one-time expenses (such as purchase of equipment) were provided by federal grant. This will probably apply for the first expansion county and will apply in part for several subsequent expansion counties because of equipment purchased in anticipation of expansion. These one-time expenses should not be included in projected administrative costs unless properly amortized.

The gist of the foregoing comments on administrative costs is to point out that the subject is complex and must be studied carefully. This office has attempted to perform several in-depth studies of projected expansion savings and costs, but the results are imprecise because the unknown factors and variables are so numerous. Suffice it to say, the results of all studies in this office, even based on conservative assumptions, demonstrate that the Middlesex system will result in a net savings including apportioned administrative costs of at least twenty-five percent of existing juror compensation costs in any expansion county. There is much pressure to increase juror compensation and travel allowances in other counties. If these rates are increased as expected, the costs of the traditional jury system will increase substantially. In this event, the savings realized under the Middlesex system will be even greater.

Not only does the Middlesex jury system save dollars for the Commonwealth, the financing plan is more equitable. Most jurors receive their regular wages from their employers for juror service. As to unemployed jurors, the system generally awards compensation based on need rather than on fixed rates. Although some jurors may suffer loss of money because of juror service, this occurs with those who are financially secure enough to withstand the loss without incurring financial hardship. The system is designed to grant relief to any

person who would suffer financial hardship because of juror service.

Table I, entitled "JUROR COMPENSATION, 1978-1981," contains an analysis of the compensation paid to grand and trial jurors for each jury-trial location in Middlesex County during the years 1978 through 1981 inclusive. The first year of operations of the new Middlesex system was 1979. Therefore, a comparison between 1979 and 1978 provides an estimate of the financial impact of the new system over the former system. It is seen that total juror compensation during 1979 decreased \$535,706 or 64%.

It is worth noting the relatively small costs of providing jurors to District Courts under the Middlesex system. In 1981, the total cost of providing jurors to the Framingham District Court for the entire year was \$2,077; to the Lowell District Court for the entire year, \$814. Since jury trials in the District Courts are ordinarily completed in one day, these costs are principally comprised of reimbursements paid to jurors for travel, parking, child care, financial hardship, etc.

Grand juror compensation increased substantially under the new Middlesex system. A good portion of this compensation was in addition to regular wages received by grand jurors. The proposed expansion bill provides for three major changes in the method of compensating grand jurors. Employers will be required to compensate their employees for the first three days of grand juror service (in the same manner as trial jurors). For the fourth day of service and each day thereafter, each grand juror will be paid by the state only so much as is necessary to place the juror into the same financial position as he or she would have been in were it not for grand juror service, i.e., to reimburse for financial loss incurred because of grand juror service up to fifty dollars per day of service. The term of grand juror service will be reduced to three months with the ability to enlarge the term when necessary. As in the existing law, the court will have ample discretionary power to avoid financial hardship being imposed upon any juror. These changes would reduce grand juror compensation by eliminating "double

dipping" and without causing financial hardship to any grand juror.

Table I shows that the costs of compensating jurors has increased each year since 1979. There are two reasons. The numbers of jurors used has increased, and jurors are being held for longer periods. These increased demands for jurors are probably the result of court reorganization. In the Superior and District Court Departments, more jury trials are being conducted. (This underscores the need to utilize jurors more efficiently. Juror utilization and management are discussed in the last section of this report.)

Table II, entitled "NUMBERS OF JURORS AND JUROR DAYS" demonstrates the increased demands for trial and grand jurors. In 1980, there was a 25% increase in the number of trial jurors summoned compared with 1979. Comparing the same years, there was a 31% increase in the total number of juror days and an 18% increase in the number of payable juror days. If a juror serves for five days, five "juror days" are counted and two "payable juror days" (the fourth and fifth days) are counted. The increases in number of jurors and duration of service resulted in a 20% increase in cost of compensation.

In 1981, there was a 1% increase in the number of jurors and a 31% increase in payable juror days compared to 1980, resulting in a 34% increase in cost of compensation. During 1981, the number of payable juror days increased (meaning more trials lasted longer than three days). This had a significant impact on the cost of compensation. There was only a 1% increase in the number of jurors. This demonstrates that the cost of juror compensation under the Middlesex system is much more sensitive to the length of trials than it is to the number of trials. The Middlesex system can handle large volumes of trials, but it is optimized financially when all (or almost all) trials last three days or less. This is an incentive to complete jury trials in three days or less whenever possible. This attribute also demonstrates how well the Middlesex system is suited to jury trials in district courts (as was pointed out above in Table I).

The bottom half of Table II shows that grand juror usage and compensation increased 14% in 1980 and 15% in 1981. As explained above, these costs can be reduced substantially without imposing financial hardship on any grand juror if proposed amendments to the statutory compensation plan are enacted.

All of the data in Table II has been derived from Table I and Figure VI for the appropriate years. Payable juror days may be gleaned from Figure VI as follows. The first three entries in the "FREQ" column are ignored because these days are not "paid" by the Commonwealth. 979 jurors served 4 days; count 979 payable days. 535 jurors served 5 days; count $535 \times 2 = 1070$ payable days. 290 jurors served 6 days; count $290 \times 3 = 870$ payable days, and so on. The sum of these counts is the total number of payable days for the year.

Table III, entitled "COSTS OF ADMINISTRATION," provides a complete accounting of all monies spent, federal and state, by the Office of Jury Commissioner since the establishment of the office in 1978 through calendar year 1981. These expenses include all initial start-up costs, capital outlays for furniture and equipment, computer programming and other developmental expenses, educational conferences, the videotaped juror orientation program, and the Juror's Handbook. Costs of design and purchase of computer forms (summonses, postponement notices, etc.) and all postage expenses are included. Personnel salaries and office administration expenses are included.

Lastly, the Table contains costs of travel and compliance with federal-grant obligations; many responsibilities of federal grants are in addition to those required for the implementation and administration of the Middlesex juror system (not to overlook the additional budgetary and accounting duties). The Table does not reflect costs of the computer. Computer capacity and incidental services are provided to the Office of Jury Commissioner without charge by the Office of the Chief Administrative Justice of the Trial Court.

TABLE IV
COST PER JUROR DAY - 1981

MIDDLESEX COUNTY

<u>Description</u>	<u>Trial</u>	<u>Grand</u>	<u>Total</u>
Juror Compensation	\$377,960	\$95,200	\$ 473,160
Juror Days	59,570	2,380	61,950
Compensation/Juror Day	\$ 6.34	\$ 40	\$ 7.64
Administrative Costs			\$ 391,005
Adm. Cost/Juror Day			\$ 6.31
Total Cost/Juror Day			\$ 13.95

County Other Than Middlesex*

Compensation/Juror Day	\$ 14.00
Estimated Travel Allowance/Juror Day	\$ 5.00
Estimated Administrative Cost/Juror Day	\$ <u>3.15</u>
Total Cost/Juror Day	\$ 22.15
Estimated Savings/Juror Day Middlesex System v. Traditional System	\$ 8.20

*There is strong pressure in the Legislature to increase these rates.

Perhaps the simplest and best tool for estimating the financial impact of expansion of the Middlesex system is the cost-per-juror-day statistic. If one computes the total cost of the juror system in Middlesex County during 1981 and divides by the total number of juror days, the quotient is an estimate of how much the Commonwealth pays to bring in one juror for one day's service. When compared to the cost per juror day in the traditional jury system, the difference yields a reliable basis for estimating the financial benefits of expansion.

Table IV, entitled "COST PER JUROR DAY - 1981," contains the analysis and data for computing the cost-per-juror-day statistic. Note that all estimates are conservative. In Middlesex County, costs include administration and compensation, federal and state, ongoing and capital outlay. Actual costs will be lower.

Outside Middlesex, the daily compensation rate is estimated at \$14 (although it is higher if the juror serves on a capital case or on a sequestered jury). The travel allowance is estimated at 25 miles round-trip at 20 cents per mile. There are no reliable estimates of administrative costs of juror administration outside Middlesex County. For purposes here, it is estimated at \$3.15 per juror day or half that of Middlesex. Thus, the overall cost per juror day is estimated as \$22.15 outside Middlesex County.

This figure is likely to increase in the future because of growing pressures by the public and in the Legislature to increase juror compensation. Nevertheless, the savings that would be realized if the Middlesex system were expanded would be \$8.20 per juror day. Assuming a court requires 100 jurors per day, \$820 will be saved each business day. Assuming 225 court days in the year, an estimated \$185,000 savings would be realized for this court under the Middlesex system. (For benchmark purposes, Suffolk County uses approximately 250 jurors per day. The estimated savings in Suffolk County based on the same assumptions for expansion of the Middlesex jury system would be \$461,000.)

JUROR UTILIZATION AND MANAGEMENT

The goal of juror management is that every juror who appears for service will sit on a trial. The problem is that the need for jurors cannot be predicted with accuracy. Cases which appear to require jurors even on the afternoon preceding trial frequently are disposed of without jurors because of pleas and settlements. It is academic to attempt to define the problem as one of case management or juror management.

The fact is that the most frequent complaint or frustration of Middlesex jurors is that they were not able to sit on a case. The jurors' interests are peaked by the orientation program, and many are sincerely disappointed when they are not afforded the opportunity to hear a case. Ironically, the availability of jurors is believed by many to be the motivating factor for most pleas and settlements. However, the explanation "they also serve who only stand and wait" rarely satisfies a disappointed juror.

In a nutshell, the Middlesex jury system can and should improve its utilization of jurors. While being exemplary in virtually every other facet of juror selection and management, the Middlesex system does not meet national standards and guidelines for juror utilization. The problem is very complex, because juror utilization and case management are inseparable. The interests of the court in disposing of cases expeditiously must be paramount. Nevertheless, there are reasonable changes in court procedures and practices that should be made which will improve juror utilization and will have a beneficial effect on case management as well. Better management of the scheduling of jury trials with an eye on improved juror utilization will have a synergistic effect on both areas of administration.

In Middlesex County, all persons over age 18 may be selected for juror service. For the calendar year 1981, the Office of Jury Commissioner randomly drew a master juror list of approximately 125,000 residents of the county. Almost 100,000 of these people were summoned for service within 1981. Table V,

entitled "SUMMONING DATA-1981," presents an approximate picture of what happened to those 100,000 potential jurors. Line 2 indicates that about 34% of those summoned confirmed their service for the date on which they were initially scheduled to serve. Another 27% confirmed, but requested a postponement to a later date in 1981 or 1982. About 61% (or 61,000 jurors out of the 100,000 summoned) were positive responses. This figure is down from the 1980 figure of 64%, but with reason. Approximately 5% of the adult population of the county perform juror service each year. Therefore, the number of persons who are exempt from juror service because they have served within the past three years will increase each year until the fourth year of operations at which point it will level off at approximately 15% of the eligible population.

Another reason for exemption from juror service is medical disability. Jurors under age 70 who request this exemption must provide a registered physician's letter as proof of the disability. Approximately 45% of the incompetencies, or 11,250 people, requested medical exemptions. Another 25%, or 6,250 people, were exempted for not being a resident of Middlesex County.

Along with a liberal postponement policy, the Middlesex system provides for transfer to another jury-trial location within the county if the juror experiences hardship in reaching his assigned court. 30% of confirmed and postponed jurors exercised this option.

40,328 jurors walked through the doors of Middlesex County trial courts during 1981. Table VI, entitled "JUROR UTILIZATION DATA-1981," shows how many of these people were impanelled, challenged, or excused, the numbers and types of trials, and the numbers of available jury-trial start days.

Taking the Cambridge data as an example, 26,394 jurors were brought into the pool during 1981 (Line 1). Of these, 20,253 reached a courtroom for potential impanelment (Line 2), or 77% of the total brought-in (Line 3). Reading down the column, one can determine on how many days jurors were utilized or no

trials began. Line 8, People-Brought-In (PBI) is an average of how many jurors were brought in to begin each trial. In Cambridge, 26,394 jurors were brought in to begin 704 trials, for a PBI of 37 jurors per trial. Some of the statistics have standards set by the Law Enforcement Assistance Administration (LEAA). These standards are listed in the footnotes.

Table VII, entitled "JUROR UTILIZATION FACTORS-1981," contains the Juror Utilization Factor (JUF) for each jury-trial court in Middlesex County for each month of 1981. The definition of JUF appears at the bottom of the Table.

With the exception of the Cambridge court, juror utilization has slipped from 1980 to 1981. At Cambridge, the JUF during 1981 averages 77%. This is an 8% increase over 1980's JUF. In other words, 8% more jurors were utilized in Cambridge during 1981 than in 1980. 704 trials were begun in 1981 versus 579 in 1980, a 22% increase which was handled with only 8% additional jurors.

The picture is not so bright when reviewing the other courts' progress. Each of the smaller courts conducted substantially fewer jury trials during 1981 than in 1980, yet more jurors were brought in. Table VII shows an overall JUF of 34% for Framingham District Court (vs. 51% in 1980); a JUF of 37% for Lowell District Court (vs. 64% in 1980); and a JUF of 58% for Lowell Superior Court (vs. 70% in 1980). The Lowell Superior Court has a telephone call-in system by which jurors may be cancelled during the afternoon and evening before juror service. This system allows the court to reduce the flow of jurors if it can be determined late in the previous court day that fewer jurors will be needed on the next day.

All courts in Middlesex County may improve their utilization of jurors. Better calendar coordination techniques need to be utilized as well as improved communication between the Office of Jury Commissioner and the outlying courts. Various management techniques may be applied to raise juror utilization to an acceptable level while not impeding the flow of cases through the court.

It should be emphasized that the quality of a juror management and selection system must not be judged solely by its efficiency rating. Other factors, such as providing fair and impartial jurors, raising the public's awareness of and appreciation for the judicial system, and providing courteous and expedient service to the public and the courts must be taken into account. These factors are critical components in the process even though they do not lend themselves to quantitative measures. These services are provided daily by the Office of Jury Commissioner.

For example, the operations department answers approximately 500 telephone calls per week. 5,568 last-minute deferrals and corrections of juror's schedules were processed during 1981, as well as 4,221 judicial excuses. Delinquency notices are sent to all jurors who do not appear as scheduled (after a brief grace period). In addition to summoning, postponing, and transferring jurors, handbooks are sent in advance to each scheduled juror. Certificates of attendance are issued to each juror who has appeared for juror service. The certificate is issued in duplicate, one copy for the juror and the second copy for the juror's employer.

From the juror-management viewpoint, one attempts to determine statistically the future needs for jurors based upon prior experience. Each month, the Office of Jury Commissioner plots juror utilization charts for each court location in the county.

Figure VII, VIII, IX, and X are the charts for November, 1981, for Cambridge, Lowell Superior, Lowell District, and Framingham District Courts respectively. There are various measures or indices of juror utilization. The Juror Utilization Factor, or "JUF," is the principal index used by the Office of Jury Commissioner. It is defined as the ratio of jurors "used" divided by jurors available. Thus, if 100 jurors appear for service and 75 are used, JUF equals 75%. There are two generally accepted definitions of the word "used" in the numerator. If "used" includes impanelled jurors only, the ideal JUF is 100%. The ideal is not realistic since extra jurors must always be sent to voir dire because

of excuses for cause and peremptory challenges.

The Office of Jury Commissioner uses the following definition of "used" (which is also the definition recommended by the (Center for Jury Studies). Any juror sent to voir dire whether impanelled, challenged, or extra, is counted as used. With this definition, values of JUF greater than 100% may occur. A juror who was challenged or extra in one case may be sent to voir dire in a second case resulting in a second count of the same individual in the numerator. The national standard for JUF is 100%. Even though the standard may be exceeded on occasion, the system is operating at excellent efficiency if it can expose each juror to the impanelling process in the courtroom. Middlesex County has not been successful in meeting this standard. As shown in the four charts, no court met the standard.

L.E.A.A. JUROR UTILIZATION STANDARDS

(1) JUF Standard: 100% of jurors in pool should go to a courtroom.

(2) Impanelment Standard: 50% of jurors sent to courtroom should be impanelled.

(3) PBI Standard: For 12-person jury - no more than 30 jurors per panel.
For 6-person jury - no more than 18 jurors per panel.

(4) Zero-Trial-Start Days Standard: less than 10% of available days.

(5) Average-Trial-Starts per trial day: more than or equal to 3 trial-starts per day.
